

GS Medical Lighting

The Welch Allyn LED lighting range offers a low cost of ownership and allows clinicians to diagnose and treat patients with white, bright light for true tissue colour rendition. Four models, with various configurations make the range ideal in a variety of care settings.

Key customers/areas

GPs, Nurses & HCAs | Use examination lights daily
 GP treatment rooms | For minor procedures
 Community clinics & new builds | For examinations & minor procedures

Questions to ask | discover

1. Which lights have you used in the past? -- -- →
2. What type of setting is the light to be used? And for what purpose? -- -- →
3. How satisfied are you with the light colour of your existing lights? -- -- →
4. How many years are you looking to use this light for? -- -- →
5. Would you be interested in a light which helps reduce the spread of infections? -- -- →

Customer pains | understand

1. Previous lighting has not been very durable and sags under its own weight
2. Not sure which light is most suitable?
3. Current/previous lighting equipment is not providing accurate tissue colour rendition
Too much heat from the halogen lamp.
4. Want reassurance of durability and a low ownership cost
5. The light must be easy to clean

Features & benefits | relate

Feature	Benefit
1. Highly durable light pipes	No aging effect means no sag. Ideal for constant use.
2. Range of lights and mounting options	Ideal for a variety of settings. Can be mounted in many areas.
3. LED bulbs	True tissue colour rendition for more accurate diagnosis. Even, homogeneous light (no hot or cool spots in light quality). Low cost of ownership - no costly bulb replacements. Cool light - no heat from lamp
4. Five year warranty	Reassurance of a long life and very cost effective
5. Touchless on/off buttons and sleek design	Reduce cross contamination and easy to clean

★ Why Welch Allyn | unique
