

BD™ Filter Needles and BD Nokor™ Needles

Reduce glass particles when preparing medications from ampules.

BD Filter Needles feature a molded-in 5 Micron filter membrane that reduces larger particulates when aspirating, reconstituting and transferring fluids or when withdrawing medication from glass reservoirs.¹

BD™ Filter Needles

Catalog #	Description
Thin Wall 5 Micron	
305200	19 G 1 1/2"
Thin Wall 5 Micron with BD Nokor™ point	
305201	18 G 1 1/2"

The BD Nokor needle design features a cannula side port to place fluid on the side wall of a container during reconstitution. Some drug manufacturers recommend this to help reduce foaming or spray of powdered medication.

- BD Nokor design eliminates clogged cannula, retaining venting capability
- Vented needles available, designed to reduce internal container pressure

BD Nokor™ Vented Needles

Catalog #	Description
Thin Wall Non-Coring Vented Needle	
305213	16 G 1"
305214	18 G 1"
305227	18 G 1 1/2"
