Description

Roscoe's Sapphire CPAP Masks have an advanced mask design with a unique 3D cushion that forms an excellent seal and provides patients with superior comfort while protecting the skin from pressure points and irritations. It is both removable and replaceable. The innovative angleadjustment forehead support has five levels of adjustment to meet a patient's individual needs and provide the best fit possible. The soft silicone pad contours to the forehead keeping the mask in place and stable throughout the night. The lightweight, quick-release headgear eliminates the need for constant adjustment. Available in both full-face and nasal styles.

Lightweight advanced design ensures maximum comfort and compliance.

Smaller facial footprint

Comes complete with frame, 3D cushion, adjustable forehead pad, headgear, clips, and user manual with care instructions.

Soft 3D cushion mask technology provides for an effective, yet comfortable seal. Cushions are removable and replacements are available.

Innovative angle adjustable forehead pad has five levels of adjustment for the best fit possible.

Quick-release headgear with Velcro® fasteners allows for easy removal and eliminates the need for constant adjustment.

Quiet air vent minimizes noises so patients are not disturbed during the night.

Available in full-face or nasal style in small, medium and large sizes

Replacement seals available

Latex-free

90 day limited warranty
