Delta-Lite® Plus

Use the Glove of Your Choice and Customize the Set Time to Your Individual Needs

Delta-Lite® Plus is constructed of a 100% fiberglass substrate and specially formulated polyurethane resin with built-in slip agent. The built-in slip agent allows you to use the glove of your choice and the resin formula allows you to customize the set time to your individual needs.

Faster Set Time For Experienced Clinicians and Less Difficult Applications

- 1) Submerge cast tape in room temperature water (Max 77°F / 25°C) for 5 seconds.
- 2) While submerged squeeze the cast tape 2-3 times using firm pressure. The more water that is forced into the roll, the faster the set time.
- 3) Remove from water and give 2-3 firm squeezes to remove water. The more water removed, the faster the set time.

Slower Set Time For Less Experienced Clinicians and More Difficult Applications

- 1) Submerge cast tape in room temperature water (Max 77°F / 25°C) for 5 seconds.
- 2) Do not squeeze cast tape while submerged.
- 3) Remove from water and shake to remove excess water. The more water that remains within the roll, the slower the set time.

Delta-Lite® PlusThe Trusted Rigid Solution

Your new standard of casting.

Delta-Lite® Plus is our newest fiberglass cast tape that combines a fiberglass substrate and advanced water activated polyurethane resin system which provides tack free properties. The tack free properties allow ease of application and molding using standard examination gloves.

Features and Benefits

Tack free resin - Use exam glove of your choice. Improves unrolling tension, improving ease of cast application

Rigid finished cast - Creates long-lasting, light-weight cast

Smooth surface - Less abrasive finished cast enhances patient comfort while it reduces clothing snags

Good conformability - Makes casting application easier with change of anatomy

Outstanding molding - Produces an anatomically correct cast

Excellent lamination - Creates a strong bond between layers ensuring a strong finished cast
