Cell-to-cell and edge-to-edge dimensions are rounded to 0.5 cm.

The ISOFLO MEMORY CONTROL® is outside the dimensions of the SELECT cushions.

Select the correct ROHO SELECT cushion for your wheelchair:

Step 1 Measure the width and depth of the wheelchair seating surface

Step 2 The table above will help you - based on the dimensions of your wheelchair seating surface - to determine the number of cells in the width and depth for your cushion

Step 3 Select the height of the cushion cells:

HIGH PROFILE = 10.5 cm

LOW PROFILE = 5.5 cm

CONTOUR SELECT = varying cell heights

## ROHO® ENHANCER®

- DRY FLOATATION® Technology: proven skin protection, both preventive and curative up to category 4 pressure ulcers

- Additional lateral stability due to design (anatomical contour) and control of air circulation in 4 chambers

- The Enhancer cushion provides positioning through different cell heights and the 2-chamber system. This allows the middle chamber to be adjusted independently of the outer chamber, creating reduced pressure on the tubers while maintaining stability and positioning.

- Fire retardant, hypo-allergenic neoprene

- No weight limit

- Includes standard cover and pump (option: Heavy Duty / incontinence cover)

- Warranty: 36 months

## ROHO Airlite®

- The Airlite is a maintenance-free cushion. The soft, comfortable foam base with the built-in, nonadjustable AIR FLOATATION® air insert allows the cushion to conform to your body while also preventing you from bottoming out in your wheelchair. The gentle contour of the leg trough helps you maintain the right position and posture.

Cell-to-cell and edge-to-edge dimensions are rounded to 0.5 cm.

Select the correct ROHO DRY FLOTATION cushion for your wheelchair:

Step 1 Measure the width and depth of the wheelchair seating surface

Step 2 The table above will help you - using the dimensions of your wheelchair seating surface - to determine the number of cells in the width and depth for your cushion

Step 3 Select the height of the cushion cells:

HIGH PROFILE = 10.5 cm

LOW PROFILE = 5.5 cm

# AGILITY Backrest system

Strong | Adjustable | Comfortable

No two people are the same.

And after 40 years of experience, we know that "an always-fitting size" doesn't exist when you cater to your clients' individual needs.

That's why ROHO AGILITY back systems are designed to accommodate different body sizes and shapes and can be easily adjusted - even when your clients are seated.

ROHO AGILITY back systems are designed to adapt to virtually any wheelchair, and once properly installed, they stay secure and in position.

And because they're constructed of aviation-grade aluminum frames, durable AIR FLOATATION inserts and high-density Zytel® composite hardware, they'll keep even your most active clients safe and secure.

Included as standard when ordering a back system; Back shell / Attachment (Quick Release) / Sleeve / Foam base with air pad / Replacement foam base / Lumbar support / Hand pump / Repair kit / Tools / Instructions for use.

# AGILITY<sup>®</sup> MAX CONTOUR

## Recommended for clients who:

- Require a substantial amount of postural support
- Dependent on making transfers
- Need maximum trunk support

## Models:

- Foam with air insert
- Foam with air insert + lumbar support
