ORDER #3655D-621 UNITS/CASE - 50

CAUTION: Federal law (USA) restricts this device to sale by or on the order of a physician. Single patient use. Not intended for reprocessing.

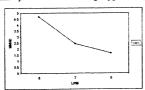

Instructions for Use

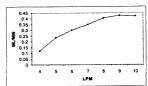

Includes Nebulizer, Tee, Corrugated Tube, 7' Patient Tube

- 1. This product is intended for use in delivering aerosol medications.
- 2. Remove nebulizer from the package and add prescribed medication in opening at the top of nebulizer.
- 3. Attach corrugated tubing to tee, then attach tee to nebulizer top. Attach mouthpiece to open end of tee.
- Attach 7' tubing to bottom of nebulizer cup; connect other end of tubing to your DeVilbiss pulmonary drug delivery device's air outlet port.
- 5. Ensure all connections are secure; turn on your DeVilbiss unit. Confirm appropriate aerosol function. If necessary, tap nebulizer cup until mist appears.
- 6. Begin treatment as instructed by your physician. Continue until all medication has been aerosolized. Some of the medicine may cling to the sides of nebulizer cup during treatment. Occasionally tap cup to nebulize medication.

 Λ

This product is designed for use with compressors; not tested for use with anesthetic or ventilator systems. Patients using oxygen therapy should never do so near ignition sources.

Performance information may not apply to drugs supplied in suspension or high viscosity form, consult drug supplier.
