American Diagnostic Corporation

The New American Standard

ADC® medical instruments and accessories have been carefully designed to meet the rigorous demands of the most discriminating healthcare professionals throughout the world.

In use on six continents in over twenty different countries, ADC® products enjoy a reputation for advanced design combined with skilled craftsmanship.

ADC® products are manufactured from the finest materials with an uncompromising concern for quality. Exhaustive inspection of every item by our factory-trained quality control staff ensures strict compliance with ADC®'s standards for performance and durability. And the commitment to manufacturing excellence is backed by the industry's most extensive warranties.

State-of-the-art distribution combined with a knowledgeable, courteous staff guarantees that the service you receive will be as outstanding as the products we deliver.

So compare the quality, performance, and most important, the value of ADC® products to any others you can buy.

You'll discover that there's really…
no comparison at all!

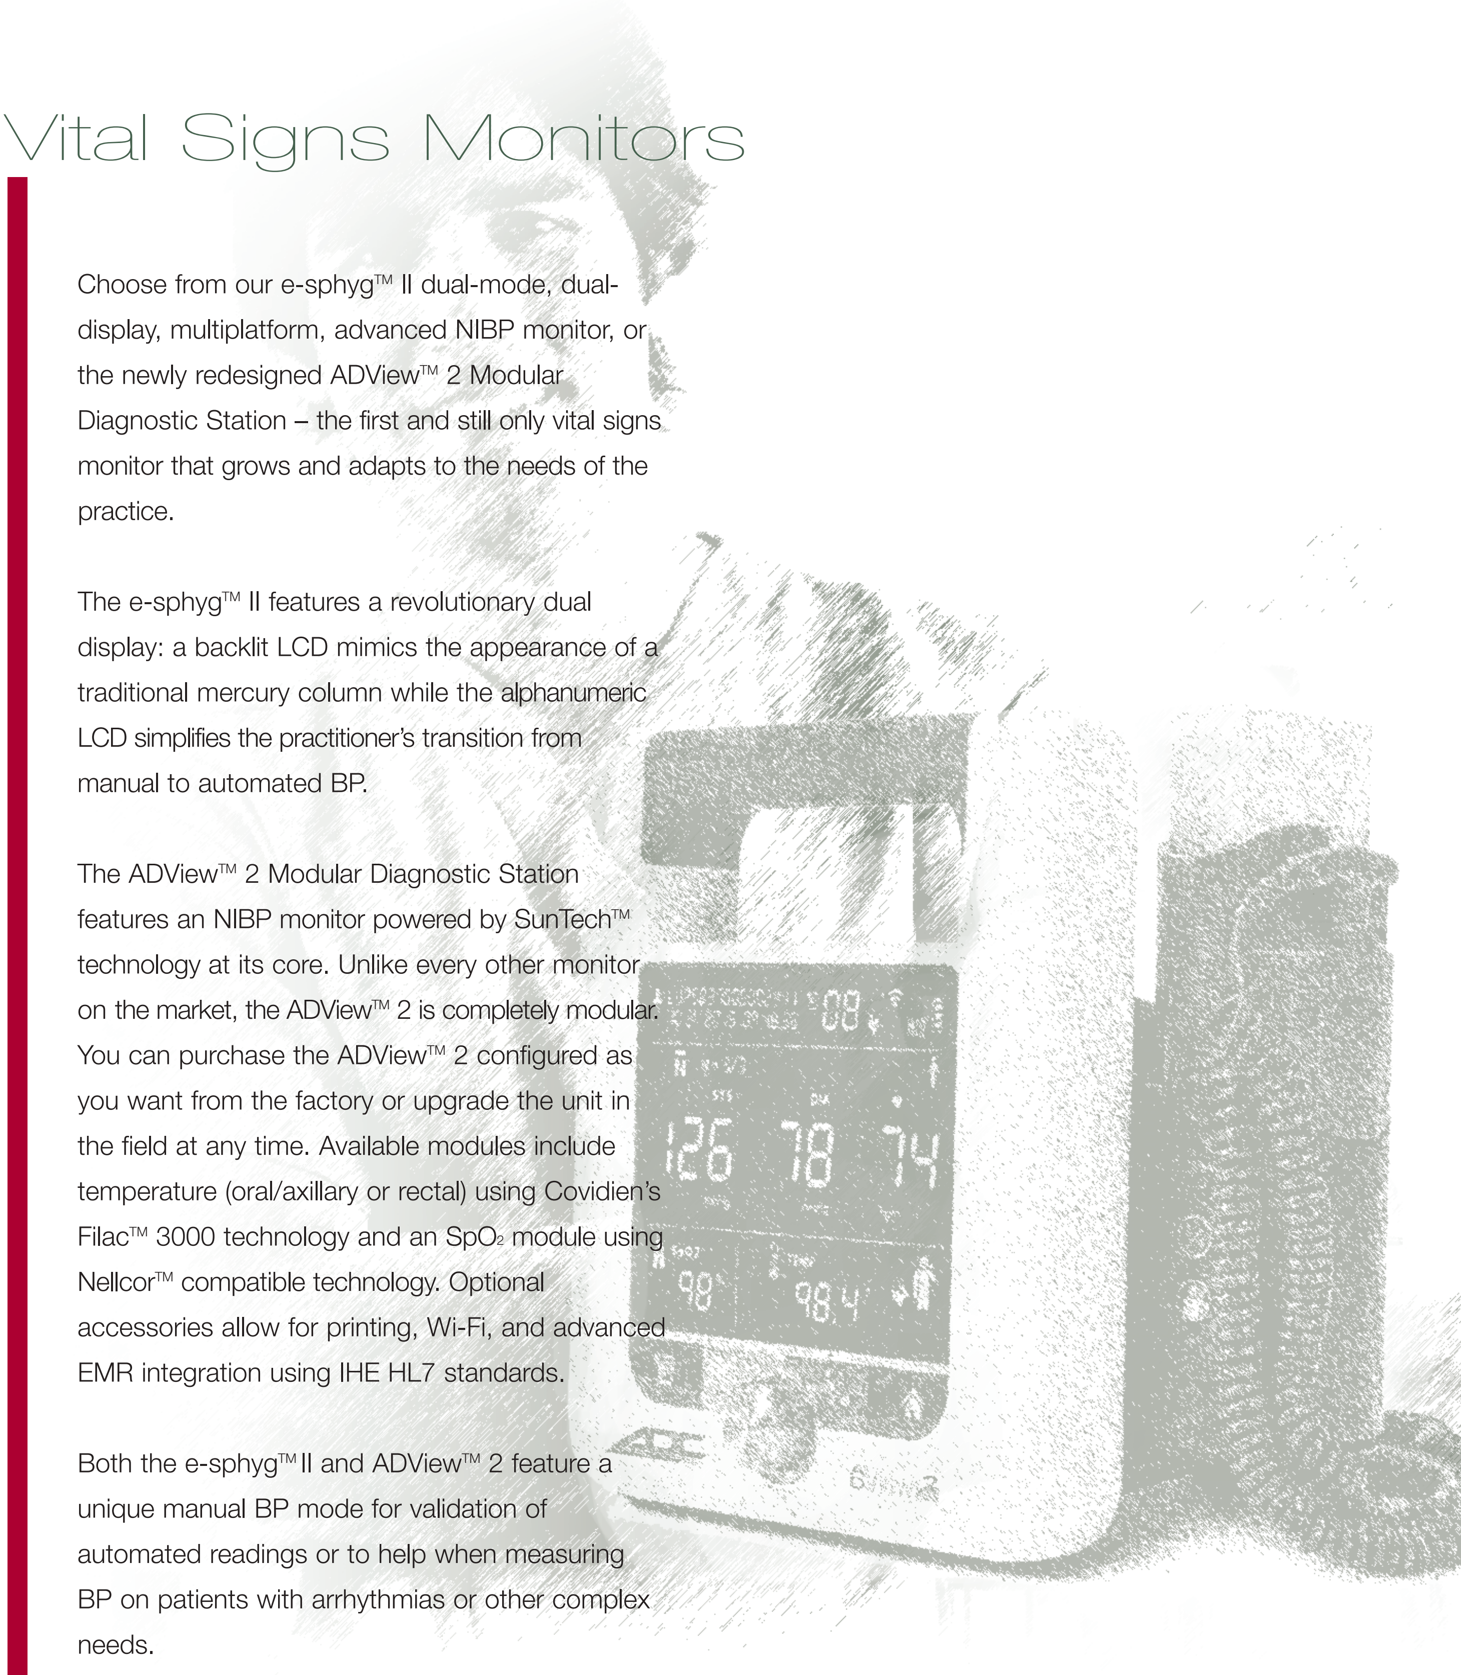
Vital Signs Monitors



Choose from our e-sphyg™ II dual-mode, dual-display, multiplatform, advanced NIBP monitor, or the newly redesigned ADView™ 2 Modular Diagnostic Station – the first and still only vital signs monitor that grows and adapts to the needs of the practice.

The e-sphyg™ II features a revolutionary dual display: a backlit LCD mimics the appearance of a traditional mercury column while the alphanumeric LCD simplifies the practitioner's transition from manual to automated BP.

The ADView™ 2 Modular Diagnostic Station features an NIBP monitor powered by SunTech™ technology at its core. Unlike every other monitor on the market, the ADView™ 2 is completely modular. You can purchase the ADView™ 2 configured as you want from the factory or upgrade the unit in the field at any time. Available modules include temperature (oral/axillary or rectal) using Covidien's Filac™ 3000 technology and an SpO_2 module using Nellcor™ compatible technology. Optional accessories allow for printing, Wi-Fi, and advanced EMR integration using IHE HL7 standards.

Both the e-sphyg™ II and ADView™ 2 feature a unique manual BP mode for validation of automated readings or to help when measuring BP on patients with arrhythmias or other complex needs.

Both models are available in three platforms – desk, wall, or mobile – to suit the needs of the practice.

And both units are backed by ADC's extensive product warranties.

ADView™ 2 Modular Diagnostic Station

The world's first — and still only — truly modular diagnostic station. Now in its second generation.

The ADView™ 2 features

- A flexible design with up to three modules: blood pressure, temperature, and pulse oximetry
- Clinical-grade Advantage™ BP technology from SunTech Medical®
- A proprietary manual BP mode, allowing measurement with a stethoscope using the auscultatory method
- New, customizable average mode, with setting options ranging from two to five readings and start and interval delays
- A temperature module featuring Covidien Filac™ technology, providing accurate measurement in about 10 seconds. Module comes with standard oral/axillary probe; optional rectal probe available.
- ChipOx Nellcor™ SpO_2 module, providing accurate readings in about 10 seconds
- Contemporary, compact design with an easy-to-read LCD display and an integrated handle for portability
- Lithium ion power for longer battery life and lighter weight
- Desktop, mobile, and wall mount options
- Optional accessories, including a Wi-Fi dongle, a thermal printer, and a barcode scanner for uploading patient data to your facility's EMR
- Network-enabled technology with IHE HL7 messaging for electronic data transfer
- Three-year warranty on the blood pressure base unit, SpO_2 module, and temperature module; two-year warranty on cuffs; 90-day warranty on all other accessories

AMERICAN DIAGNOSTIC CORPORATION

9002DK-MCC
Desk Unit

e-sphyg II™

The world's first truly affordable dual-display, dual-mode, multiplatform NIBP monitor.

The 9002 features

- Backlit LCD that mimics the appearance of a mercury column for easier interpretation
- Multifunction alphanumeric LCD displays air pressure, deflation rate, systolic pressure, diastolic pressure, and pulse (auto mode only)
- Auto mode obtains readings automatically in about one minute
- Industry's first manual mode allows practitioners to use the time-tested auscultatory method with any sized cuff
- Automatic inflation to pre-set levels simplifies use. Electronic control valve (EVC) precisely controls deflation at one of three pre-established rates (manual mode) for optimum results
- NICAD rechargeable battery provides about 200 measurements on a single charge
- AC adapter
- Includes Small Adult, Adult, and Large Adult Adcuffs™ with exclusive Size Guide™ marking system
- TPU coiled tubing for convenience
- Cuffs and tubing made without natural rubber latex
- Available in desktop, wall mount, or mobile configurations

Finger Pulse Oximetry

ADC's line of fingertip pulse oximeters is designed to meet the varying needs and budgets of the healthcare practitioner and patient.

Our fingertip pulse oximeters combine the finger sensor probe, electronics, and display screen in one ultra-compact form, making them portable and convenient. ADC pulse oximeters display spot SpO_2 and heart rate readings in just a few seconds.

The feature-rich 2100 and 2150 are designed for professional use. Each offers a bright, two-color OLED display, six display orientations, multiple brightness settings, graphical display of pulse wave form, audible and visible alarms, and rugged construction. Rubberized, protective bumper sleeve included.

The value-priced 2200, designed for home, sport, and aviation use, features a one-color LED display, pulse strength indicator, and two display orientations.

All models come with a carry lanyard, batteries, and comprehensive operating instructions.

Finally, a line of fingertip pulse oximeters at prices that make sense from the leader in core diagnostic products.

Diagnostix™ 2100 Digital Fingertip Pulse Oximeter

A portable, feature-rich pulse oximeter that provides spot readings of SpO_2 and heart rate for the busy healthcare professional.

Aneroid Sphygs

Sourced Globally,
Assembled Locally

We contract with the world's leading manufacturers to produce ADC components to our exacting specifications. Then, using custom built inspection equipment, we subject the components to rigorous testing before the instruments are assembled and packaged in our New York facility. We're one of the few firms to hold our own 510(k) and be classed as a manufacturer of manual BP instruments.

Manometers

The "brains" of our sphygs, our manometers are engineered by Nissei, one of the oldest and most respected manufacturers of aneroid gauges. Produced EXCLUSIVELY for ADC in their state-of-the-art facility, the gauges are subjected to rigorous quality control measures before being shipped to us. We then subject every single gauge to 100% visual inspection for 0 point, and test up to 15% for accuracy. A random sample from every batch is subjected to a destructive endurance test, putting them through 30,000 inflation cycles: three times the requirements under ANSI/AAMI/ISO 81060-1. We hold our gauges to accuracy requirements at a minimum of 33% more demanding than the standards call for.

We produce three types of aneroid instruments – pocket, palm (one hand), and clock – to meet any diagnostic need.

At the heart of every ADC aneroid is a movement assembled under optimum conditions to ensure it is free of the contamination found in lesser-built competitive instruments. The precision-crafted movement is heat treated and pre-aged to eliminate hysterisis, the stretching that often plagues cheaper products and knocks them out of calibration early in their life. The basic movement is optimized for each of the various models we produce.

Pocket Gauges

Pocket gauges are our most popular design and come in a number of models to meet the varying needs and budgets of the healthcare marketplace.

It's all in the details. Die cast zinc housings are heat treated to minimize the impact of ambient temperature variations. Movements are carefully mounted and tested repeatedly. Scale plates are serialized with a code that allows us to identify the production lot. Gauges are meticulously finished in a baked enamel or a chrome plate. From our basic 809 series manometer to our top-of-the-line 800-series, each model provides a unique feature set that differentiates it from competing models. Our feature-rich 800-series manometer (used in our premium 700-series aneroid) boasts a chrome-plated housing polished to a sterling shine, an extended scale plate to eliminate parallax error when viewed from an angle, a luminescent dial, and a lifetime calibration warranty.

Palm Gauge

The palm gauge incorporates the gauge, bulb, and valve into a single assembly making it more convenient to use, particularly in multicuff solutions. To help isolate its premium movement from vibration that often disables lesser-built instruments, the 804N's movement is housed in a zinc cage suspended within an impact-resistant ABS polymer shell that acts as a shock absorber. And while most palm-style manometers utilize a traditional thumbscrew valve that is often difficult to control, our 804N manometer features a two-position trigger air-release valve. Infinite control is afforded in deflation mode. When locked in the open position, the valve provides rapid exhaust. And because it's centrally positioned behind the manometer (rather than to one side), it allows for ambidextrous use.

Clock Aneroid

ADC's clock aneroid is available in wall, desk and mobile platforms. The clock aneroid features a more robust spring to handle the heavier weight of the indicator needle and a special internal air restrictor to reduce "needle bounce" that causes lesser-built clock models to lose calibration prematurely. The specially designed lens cover mounting system prevents dust from entering the manometer and contaminating the movement. Luminescent beveled dial is easy to read in virtually all light conditions.

Domestic Assembly and Inspection

We assemble every manual sphyg (unless otherwise noted) in our New York facility. Our assemblers are thoroughly trained and empowered to reject non-conforming parts during the manufacturing process.

Final Quality Control with lot coding of every batch ensures that the instrument you receive will work perfectly.

Proprietary PVC Convertible Bladder
The design allows us to reduce the number of components by nearly 60%, ensuring virtually 100% fill rates no matter how big the demand.

Each bladder is specially formulated RF welded and tested to 50,000 cycles. 100% individually leak tested at the factory to ensure day-in and day-out dependability.

Size Icons
Part of the Adcuff's™ proprietary Size Guide™ marking system. Allows for rapid size identification.

Gauge Hang Tab
(hidden from view)
Allows convenient use with any type of pocket aneroid.

Hook-and-Loop Adhesive
Rated to a minimum of 30,000 open/close cycles and repeatedly tested to 50,000.

Index and Range Markings
Part of the Adcuff's™ proprietary Size Guide™ marking system, they facilitate the selection of the appropriate cuff size and prevent miscuffing.

End Valves
With long-lasting stainless-steel ball bearings that won't wear out.

Adflow™ models are filter screen protected, as well.

Inflation Bulbs
In either neoprene *(Diagnostix™ Models)* or PVC *(Prosphyg™ Models)*, made without natural rubber latex.

"Property Of" ID Tag
To protect your investment. Includes four-digit lot code for quality assurance.

210 Denier Nylon
With nylon thread, sewn with 11 threads per inch it's durable, comfortable, and easy to clean.

Standard and Filter Screen Protected Valves
Choice of standard or premium Adflow™ filter screen protected valves with proprietary micro-threading for precise deflation control. All valves are held to leakage standards 33% more stringent than ANSI standards require.

Properly Positioned Artery Mark
(You'd be surprised how many aren't.)

Printed on both inside and outside cuff surfaces, simplifies cuff positioning.

Bladder Flap
Secures bladder, prevents bulging.

e-sphyg™

ADC's e-sphyg™ is a revolutionary digital aneroid sphygmomanometer that replaces a gauge's vulnerable mechanical movement with virtually indestructible digital circuitry. It is to sphygs what the quartz watch was to timepieces.

The instrument requires measurement using the proven auscultatory method – the same technique that's been in use for well over a century. The only difference is that instead of using a difficult-to-read and often out-of-calibration analog gauge, or a potentially dangerous, mercury-filled instrument, the healthcare professional uses an instrument featuring a bright, backlit LCD display with 1/2" tall digits in a housing that is both splash and shock resistant. In fact, it is virtually unbreakable.
Manometer compatible with virtually any cuff on the market.

Manometer sold separately or in a complete sphygmomanometer with wide selection of inflation system colors and sizes for departmental coding or personal ID.

Lifetime calibration warranty is so comprehensive that if the device ever needs service we will repair or replace it free of charge.

Stethoscope Required

e-sphyg™

The world's first digital aneroid sphygmomanometer.

The e-sphyg™ features

- Virtually indestructible design can withstand repeated drops of five feet or more
- Splash-resistant housing for use in harsh environments
- Swivel cuff clip allows the manometer to be repositioned for easy viewing
- Auto-off function conserves battery strength
- Dual low-battery warnings
- Recalibration reminder after 10,000 cycles (free lifetime recalibration)
- Systolic assist alerts practitioner to the onset of Korotkoff sounds – makes a great training aid
- Deflation-rate display promotes proper technique in accordance with AHA guidelines
- Pulse-rate display at completion of measurement
- Manometer works with virtually every cuff on the market
- Requires familiar and trusted manual auscultation (use of stethoscope) to obtain blood pressure readings
- Two AAA batteries (included)
- May be ordered as a complete sphygmomanometer featuring nylon Adcuff™ inflation system or gauge only for use with existing inflation systems (see page 49 for e-sphyg™ manometer)
- Lifetime calibration warranty

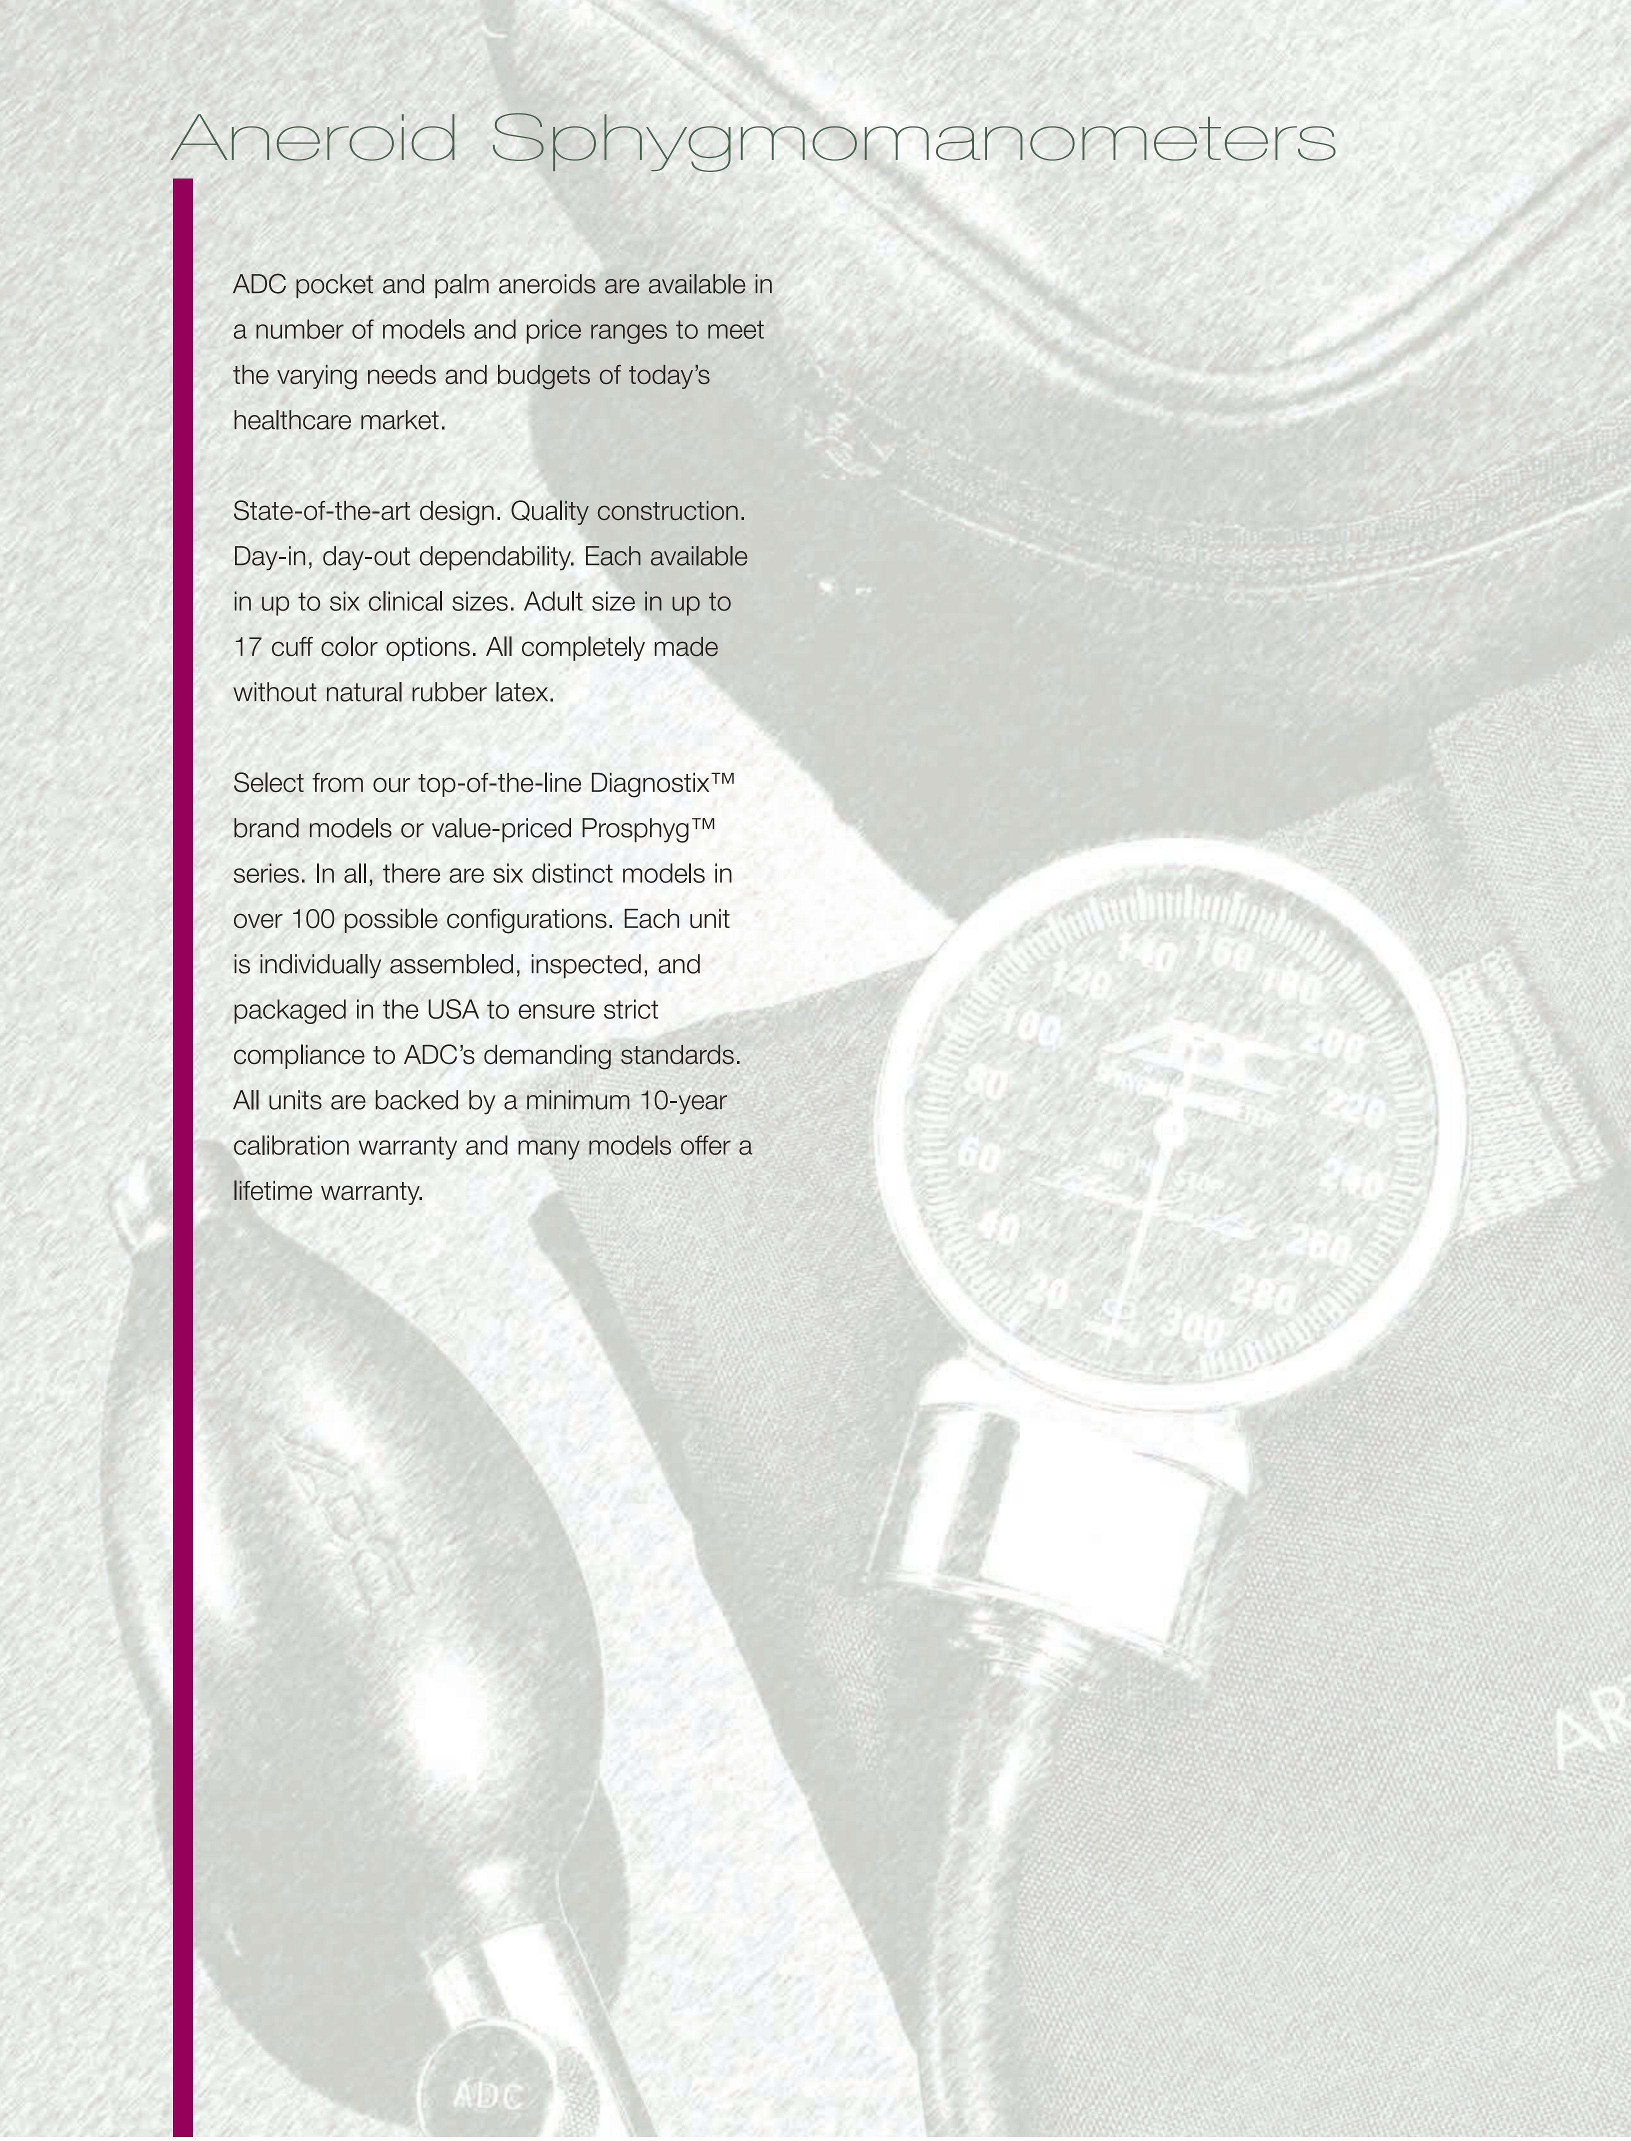
Aneroid Sphygmomanometers



ADC pocket and palm aneroids are available in a number of models and price ranges to meet the varying needs and budgets of today's healthcare market.

State-of-the-art design. Quality construction. Day-in, day-out dependability. Each available in up to six clinical sizes. Adult size in up to 17 cuff color options. All completely made without natural rubber latex.

Select from our top-of-the-line Diagnostix™ brand models or value-priced Prosphyg™ series. In all, there are six distinct models in over 100 possible configurations. Each unit is individually assembled, inspected, and packaged in the USA to ensure strict compliance to ADC's demanding standards. All units are backed by a minimum 10-year calibration warranty and many models offer a lifetime warranty.

Diagnostix™ 703 Series

A versatile palm-style aneroid sphygmomanometer. Precision-crafted performance with rugged durability.

The 703 series features

- Revolutionary palm-style manometer (804N) with integral bulb and trigger-style air-release valve for one-hand convenience; exceeds ANSI/AAMI/ISO 81060-1 specifications for accuracy and is backed by a lifetime calibration warranty
- Precision-crafted 300mmHg Japanese-engineered movement tested to 50,000 cycles
- Movement housed in a zinc cage that suspends within the polymer housing for enhanced shock resistance
- Ambidextrous infinite-control trigger-release air valve
- Adcuff™ nylon cuff with ADC's proprietary Size Guide™ marking system prevents miscuffing
- Quick-release Luer connector
- Complete with leatherette carry case with self-repairing nylon zipper
- Assembled, inspected, and packaged in the USA from foreign components

Pro's Combos

ADC's Pro's Combos combine our most popular aneroid blood pressure instruments and best-selling stethoscopes in a premium, beautifully color-coordinated carry case. Choose from five distinct models in over 90 options.

The 788 series, ideal for the pre-hospital professional, marries our virtually indestructible 703 series palm aneroid with a Sprague scope.

For the discriminating professional who prefers a more traditional design, choose our 778 featuring the 700 series chrome-plated aneroid and Adscope® 603, or the 728 series with the lightweight Adscope® 609.

The original 768 series Pro's Combo combines ADC's best-selling 760 series aneroid with your choice of a lightweight Proscope™ or Adscope® Sprague.

The 769 series features our best-selling 760 aneroid and 641 Sprague with additional instruments in a heavy-duty, color-matched nylon fanny pack.

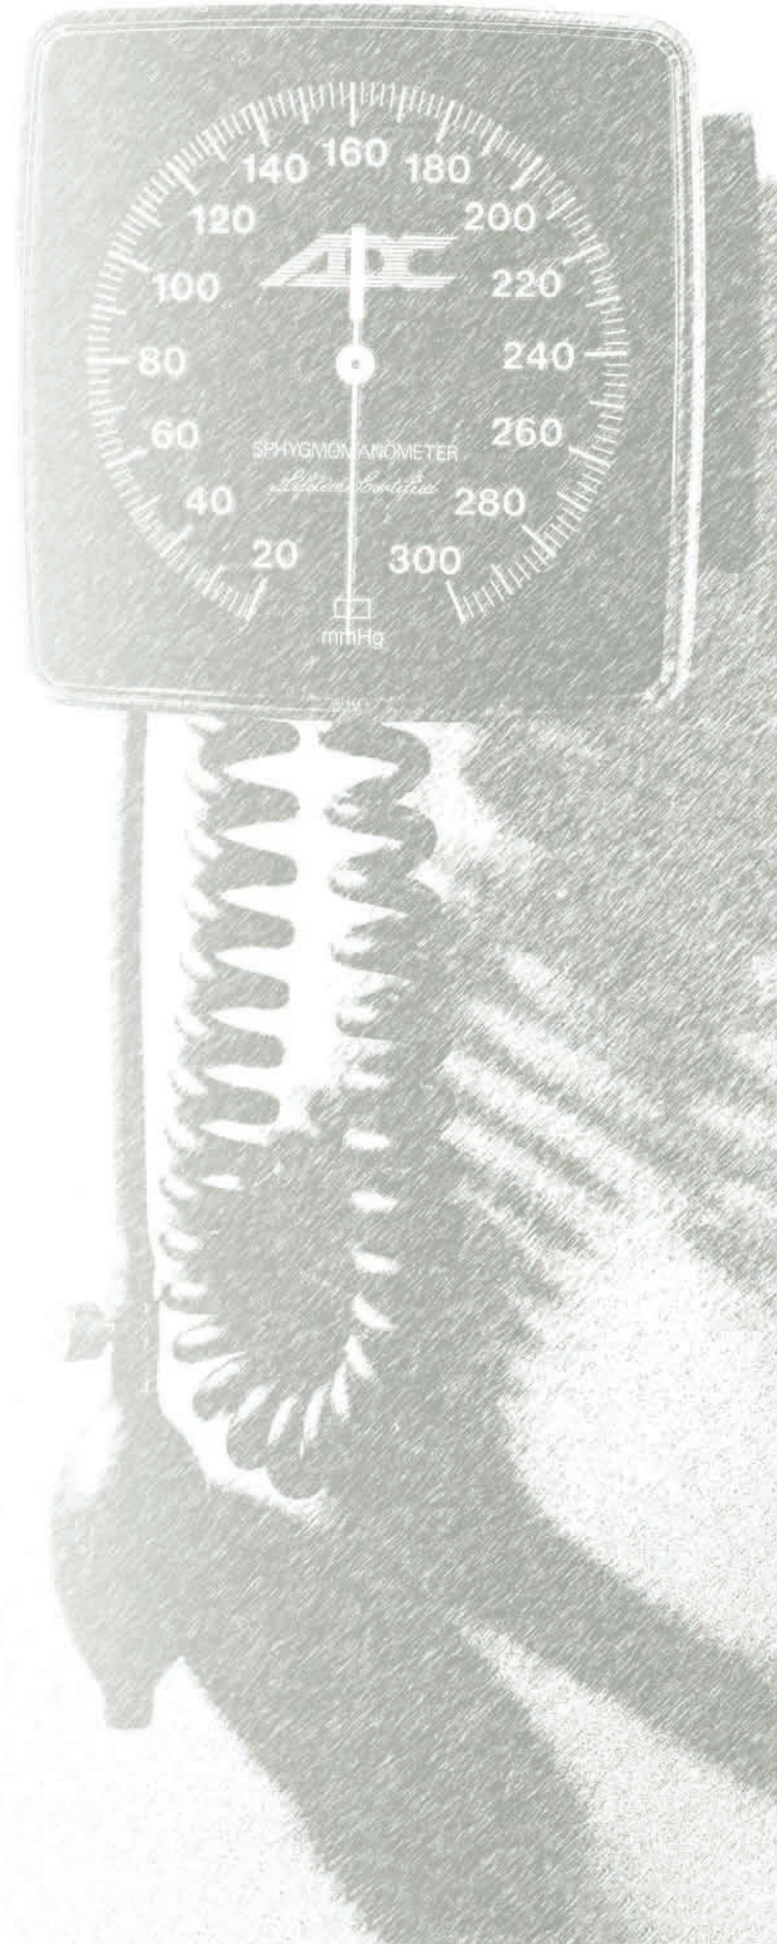
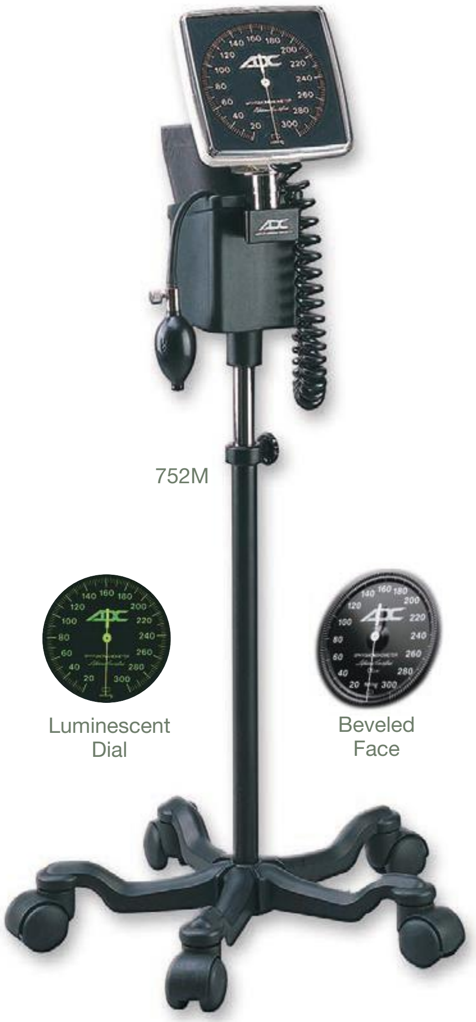
Clock Face Aneroids

ADC's clock face aneroid is the ideal blood pressure monitoring solution for institutional use. Choose from wall mount, desk stand, or mobile configurations.

High-impact housing protects the movement. Ivory color complements any decor. Six-inch luminescent beveled dial is easy to read, even in low-light conditions. Wall mount swivels 110° on its integral cuff storage bracket. The floor model, with its five-legged, weighted caster base, is height adjustable from 34" to 48". All units are equipped with an eight-foot-length (when extended) coiled tubing for convenience.

Each model is available in six clinical sizes, and each offers a three-year inflation system warranty and a lifetime calibration warranty.





752M

Luminescent Dial

Beveled Face

750D

Diagnostix™ 750 Series

A large-face aneroid available in three configurations that offer the superb precision, styling, and dependabilty synonymous with the ADC name.

The 750 series features

- Large, easy-to-read, 6” luminescent dial for high visibility in virtually any light condition
- 300mmHg no-pin stop movement withstands the heaviest use
- Manometer exceeds ANSI/AAMI/ISO 81060-1 specifications for accuracy, backed by a lifetime calibration warranty
- Inflation system includes the Adcuff™ nylon cuff, Adflow™ bulb and valve, and eight-foot length (when extended) coiled tubing
- Contemporary Euro-style ivory casing complements any decor
- Complete with all necessary hardware and assembly instructions
- Available in wall, desk, or mobile configurations
- Assembled, inspected, and packaged in the USA from foreign components

The 750W wall aneroid includes

- Wall bracket that swivels through 110° rotation for easy viewing with integral cuff storage. Optional cuff basket available (see page 54)

The 750D desk aneroid includes

- Tabletop bracket with convenient, integrated, cushioned carry handle

The 752M mobile aneroid includes

- Height-adjustable Spider-Leg™ caster stand with range of 34” to 48” (from bottom of base to top of unit)
- Integral ABS cuff storage compartment
- Manometer angled 15° for easy viewing
- 18” base diameter

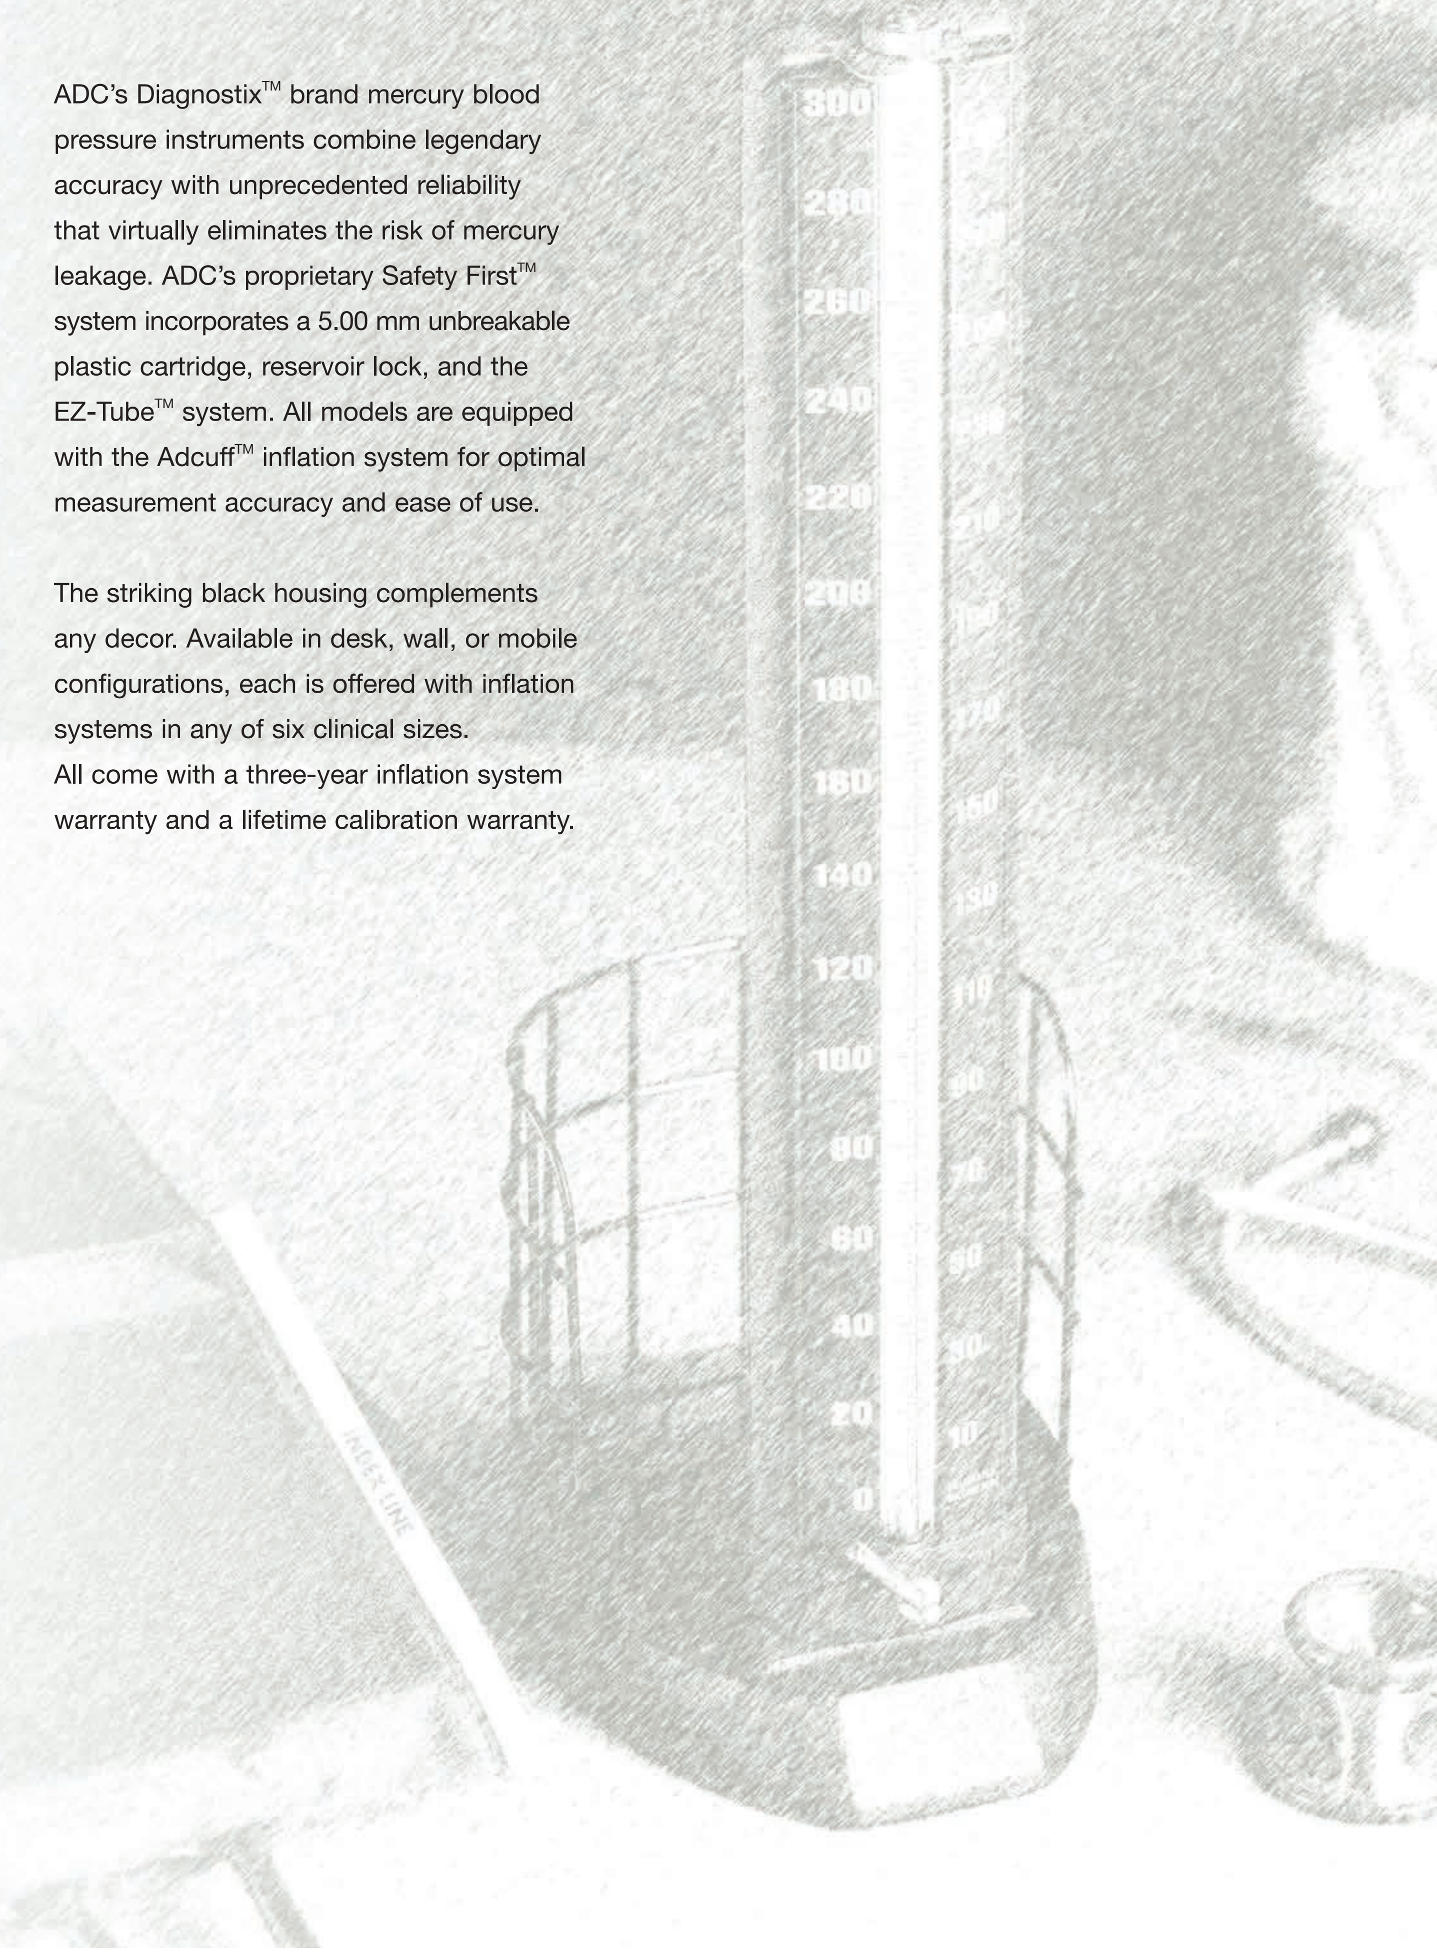
Mercury Sphygs

ADC’s Diagnostix™ brand mercury blood pressure instruments combine legendary accuracy with unprecedented reliability that virtually eliminates the risk of mercury leakage. ADC’s proprietary Safety First™ system incorporates a 5.00 mm unbreakable plastic cartridge, reservoir lock, and the EZ-Tube™ system. All models are equipped with the Adcuff™ inflation system for optimal measurement accuracy and ease of use.

The striking black housing complements any decor. Available in desk, wall, or mobile configurations, each is offered with inflation systems in any of six clinical sizes.
All come with a three-year inflation system warranty and a lifetime calibration warranty.



Diagnostix™ 922 Series

A traditional desktop mercury sphygmomanometer that follows in the quality tradition of ADC aneroids.

The 922 series features

- Rugged, die-cast aluminum housing with textured black baked-enamel finish
- Fold-down cover with spring-lock mechanism
- Graduated unbreakable plastic cartridge tube features 4.00 mm inside bore for unrestricted, friction-free mercury flow
- High-visibility red graduations
- Filter system keeps mercury clean for reliable performance
- Locking reservoir secures mercury during storage, transport, or maintenance
- Adcuff™ with ADC's proprietary Size Guide™ marking system prevents miscuffing
- Adflow™ bulb and valve with filter-screen protection
- Assembled, inspected, and packaged in the USA from foreign components
- Lifetime warranty on cartridge tube

Diagnostix™ 932 Series

Contemporary desktop instrument utilizing the same design as our wall and mobile mercurial manometers.

The 932 series features

- Rugged housing constructed from a combination of virtually indestructible ABS and die-cast aluminum
- Contemporary design with weighted base and integral wire basket for inflation system
- Graduated unbreakable plastic cartridge tube features a massive 5.00 mm inside bore for unrestricted, friction-free mercury flow
- White, oversized numerals on contrasting black scale combined with high-visibility red graduations for easy reading
- EZ-Tube™ and reservoir lock simplify safe instrument maintenance
- Adcuff™ with Size Guide™ marking system prevents miscuffing
- Adflow™ bulb and valve with filter-screen protection
- Assembled, inspected, and packaged in the USA from foreign components
- Lifetime warranty on cartridge tube

Diagnostix™ 952B Series

A contemporary, swivel-mount wall mercurial sphygmomanometer that meets the quality and safety needs of the institutional user.

The 952B series features

- Rugged housing of virtually indestructible ABS and die-cast aluminum
- Unbreakable graduated plastic cartridge tube features a massive 5.00 mm inside bore for unrestricted, friction-free mercury flow
- Monitor swivels through 110° arc for enhanced visibility
- White, oversized numerals on contrasting black scale combined with high-visibility red graduations for easy reading
- EZ-Tube™ and reservoir lock simplify safe instrument maintenance
- Adcuff™ with Size Guide™ marking system prevents miscuffing
- Adflow™ bulb and valve with filter-screen protection
- Complete with vinyl-coated, wire cuff basket, eight-foot length (when extended) coiled tubing, and all mounting hardware
- Assembled, inspected, and packaged in the USA from foreign components

Diagnostix™ 972 Series

A mobile sphygmomanometer that combines unsurpassed institutional reliability with trouble-free service.

The 972 series features

- Rugged manometer housing of virtually indestructible ABS and die-cast aluminum
- Unbreakable graduated plastic cartridge tube features a massive 5.00 mm inside bore for unrestricted, friction-free mercury flow
- White, oversized numerals on contrasting black scale combined with high-visibility red graduations for easy reading
- EZ-Tube™ and reservoir lock simplify safe instrument maintenance
- Spider-Leg™ caster stand with five legs and weighted base for stability
- 2" casters for easy mobility
- Integral ABS cuff storage compartment and handle in main unit
- Height-adjustable stand from 40" to 54" (from bottom of base to top of unit)
- Scale angled back 15° for improved readability
- Adcuff™ with Size Guide™ marking system prevents miscuffing
- Adflow™ bulb and valve with filter-screen protection
- Complete with eight-foot length (when extended) coiled tubing
- Includes all assembly tools and hardware
- Inspected and packaged in the USA from foreign components
- Lifetime warranty on cartridge tube

Home Blood Pressure

Choose from ADC's Prosphyg™ brand aneroid home kits, or the feature-rich line of mechanical and digital Advantage™ blood pressure monitors.

Like our professional models, ADC's Prosphyg™ homecare series is assembled in the USA using many of the same components found in our professional-grade products. Choose from three models, each in three sizes, and each with a 10-year calibration warranty.

ADC's Advantage™ instruments are offered in manual, upper-arm digital, and wrist digital models. Digital units feature extra-large displays, blood pressure and pulse measurement, auto-off, and memory. Smart Logic™ technology sets the inflation level automatically. All are made without natural rubber latex and all offer a five-year warranty.

SPU Cuffs

ADC's Adcuff™ SPU series of single-patient-use blood pressure cuffs has been redesigned for increased simplicity, accuracy, comfort, and value.

Cuffs are available in both adult and neonatal sizes. Choose from a one-tube configuration with a bayonet connector or a two-tube configuration with a screw connector. Standardized adapters simplify purchasing and inventory management while ensuring compatibility with most major brands of non-invasive blood pressure monitors.

Made from a woven polyester fabric (without natural rubber latex), the color-coded cuffs are exceptionally soft and comfortable.

Individually polybagged with 20 per package (child and adult sizes), 10 per package (neonatal sizes), or five per package (inflation systems).

.

Adcuff™ SPU Cuffs

Our line of single-patient-use cuffs has been redesigned for increased accuracy, comfort, simplicity, and value. Refer to page 52 for ordering information

Accuracy

- The industry's most precise cuff markings
- Optimize measurement accuracy, minimize miscuffing errors
- Properly positioned artery line and superior range guides
- Thirteen color-coded sizes facilitate proper cuff selection
- Five clinical cuff sizes for neonantal patients (limb circumferences from 3-15 cm)
- Eight clinical cuff sizes for child and adult patients (limb circumferences from 9-56.5 cm)
- 100% leak tested to assure dependability

Comfort

- Improved design features rounded cuff corners for smooth application
- One-piece construction with a soft and flexible finish

Simplicity and Value

- Economical enough for single-patient application, durable enough for repeated use
- Choose a one-tube configuration with bayonet connector or a two-tube configuration with screw connectors; add long-lasting, low-cost adapters directly to your monitor for a one-time conversion
- Standardized connectors means fewer model options and improved inventory management
- Flexible, non-proprietary solution compatible with most major monitor brands

BP Parts

ADC brand sphygmomanometer replacement parts are compatible with most major brands of blood pressure instruments. Components include Prosphyg™ and Diagnostix™ precision-crafted manometers, Adcuff™ cuffs and bladders with Size Guide™ marking system, and Adflow™ bulbs and valves.

Most components are individually boxed for greater stock control.

Inflation-system components are backed by a three-year warranty. The Prosphyg™ calibration warranty is 10 or 20 years, depending on the model. Our Diagnostix™ series manometers are backed by a lifetime calibration warranty.

Diagnostix™ and Prosphyg™ Manometers

ADC's Diagnostix™ and Prosphyg™ manometers provide unsurpassed dependability.

- Available in digital, pocket, palm, or clock-face designs
- All models meet or exceed ANSI/AAMI/ISO 81060-1
- Diagnostix™ models (800, 802, 804N, 805) feature our extended scale plate
- Select Diagnostix™ models (800, 804N, 805) offer luminescent dials
- Prosphyg™ models backed by a 10- or 20-year calibration warranty
- Diagnostix™ models covered by lifetime calibration warranty
- Individually boxed
- Refer to page 49 for ordering information

Adcuffs™

The most feature-rich, traditionally bladdered cuff on the market.

- Durable nylon construction
- Hook-and-loop adhesive rated to a minimum of 30,000 open/close cycles
- Proprietary Size Guide™ marking system helps prevent miscuffing
- Gauge hang tab, bladder flap, and "property of" tag (gauge hang tab not available on bariatric cuff)
- Seven sizes, up to a dozen colors
- Available in one-tube, two-tube, or inflation-system configurations
- Individually boxed
- Refer to page 49 for ordering information

Inflation Bladders

ADC's revolutionary, convertible bladder can be configured for one- or two-tube use.

- Specially formulated material mirrors the tensile properties of latex with improved environmental performance
- RF welds tested to 50,000 cycles
- Extruded PVC tubing in 50cm and 25cm length
- 100% leak tested at factory, randomly tested in our NY facility
- Individually boxed
- Refer to page 49 for ordering information

Bulbs and Valves

For precise control during inflation and deflation insist on ADC's bulbs and valves.

- Bulbs with standard (Prosphyg™) or filter-screen (Adflow™) end valves
- Regular or extra-large size (Adflow™ only)
- Standard valve with chrome-plated brass construction and reliable needle-seat design
- Adflow™ model is larger and more ergonomic, and features both a microthread for improved deflation control and filter-screen protection
- Refer to page 51 for ordering information

SYSTEM 5.
MULTICUFF BP SYSTEM

Storage / Carry Cases

Blood pressure cases designed to store, organize, and transport your ADC aneroid.

- Made from vinyl, nylon, or polystyrene
- Choose from five distinct models available in over 20 options
- Basic zippered cases for traditional pocket or palm aneroids
- Oversized nylon cases with additional storage for scopes or other instruments
- Compartmentalized cases for use with our multicuff systems allow rapid selection of the appropriate cuff
- Refer to page 54 for ordering information

Gauge Guards

Shock absorbers for your pocket aneroid.

- High-density synthetic rubber construction helps protect gauge from shock and vibration
- Designed to fit all ADC and most brands of pocket-style aneroid manometers
- ADC gauge guard is available in bright orange for added visibility or traditional black
- Weighs 4 oz (113 g)
- Refer to page 55 for ordering information

Adcuff™ SPU Blood Pressure Cuffs

- Economical enough for single-patient application
- Durable enough for repeated use
- Leak tested to assure dependability
- Five clinical cuff sizes for neonantal patients
- Eight clinical cuff sizes for child and adult patients
- The industry's most precise cuff markings
- Cuff design minimizes miscuffing errors
- Rounded corners and soft, woven construction
- One-tube configuration with bayonet-type (HP) connector (part 8974)
- Two-tube configuration with screw-type (Dinamp) connector (part 8971)
- Neonatal cuffs with Luer connector (part 8975)
- Standardized connectors for improved inventory management
- Add low-cost adapters directly to monitor for a one-time conversion (see page 53)
- Compatible with most brands of monitors

Stethoscopes

Precision Machined,
Hand Assembled

ADC produces more stethoscopes than any other US firm. We market our scopes under two brands: Proscopes™, primarily for institutional use, are ideal for general assessment and blood pressure measurement. Available in more than a half dozen models in hundreds of model options, all Proscopes™ retail for less than $20.

Our top-of-the-line Adscopes® meet the needs of the demanding healthcare professional. Available in more than 12 models from lightweight acoustic and the best-selling Sprague, to state-of-the-art digital electronic, we have the right scope for every application. All at prices that make sense.

ADC scopes and components are contract manufactured exclusively for ADC by some of the world's leading ISO-certified subcontractors.

They are then subjected to a variety of proprietary tests to ensure they meet our demanding standards and our customers' expectations.

A variety of dimensional tests ensure that each component is machined and molded to spec.

A torque tester ensures that models equipped with adjustable binaurals and combination (dual head) chestpieces perform consistently. Lot after lot.

Finally, our custom-made, acoustic-test machine ensures that each model performs to spec. Acoustic transfer is tested on a random sample from each production lot – whether it's a $3 disposable stethoscope or a $250 electronic model. As with our manual BP instruments, we're one of the few firms to hold our own 510(k) and be classed as a full manufacturer.

Chestpieces on our top-of-the-line Adscopes® are CNC (computer numerical control) machined to precise tolerances from premium metals like aluminum alloy or surgical stainless steel – all to provide remarkably consistent acoustic transfer performance, lot after lot. Combination models feature an acoustically precise valve stem to eliminate acoustic leakage.

ADC
ADSCOPE
ADSCOPE

Multifrequency models use ADC's AFD technology, which provides the acoustic response of a traditional bell and diaphragm in a convenient one-sided chestpiece. Our proprietary gasketed diaphragm provides both high- and low-frequency response simply by altering pressure. Each and every chestpiece is also laser engraved.

Adsoft™ Plus eartips provide the ultimate in wearer comfort and acoustic seal. Snap-on silicone inserts affix securely to every Adscope® made in our New York facility.

WARRANTY • LIFE TIME • WARRANTY

Most Adscope® models are backed by a lifetime warranty to protect the purchaser's investment.

Proscope™ Components

Binaurals for our lightweight proscopes (Bowles type, diaphragm only, dual head, pediatric, and infant) are machined from lightweight aluminum tube stock then anodized for a durable finish. Lighter in weight and up to a half inch longer than competing binaurals, ours are designed to fit the practitioner more comfortably.

Our diaphragm-only (nurse type) and combination (dual head) chestpieces use a proprietary snap-on rim and PVC-contoured diaphragm for acoustic performance up to 50% better than competing brands. And we have the independent lab tests to prove it!

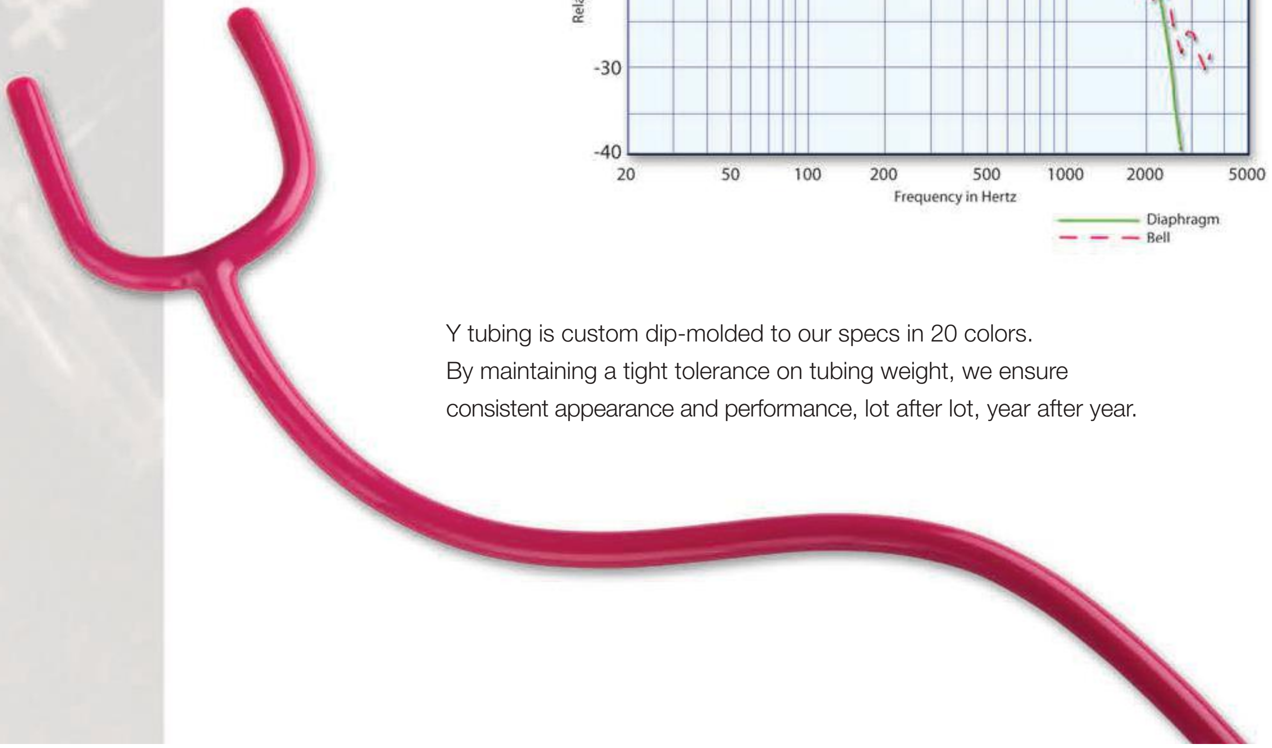
Bell

Y tubing is custom dip-molded to our specs in 20 colors. By maintaining a tight tolerance on tubing weight, we ensure consistent appearance and performance, lot after lot, year after year.



Spragues

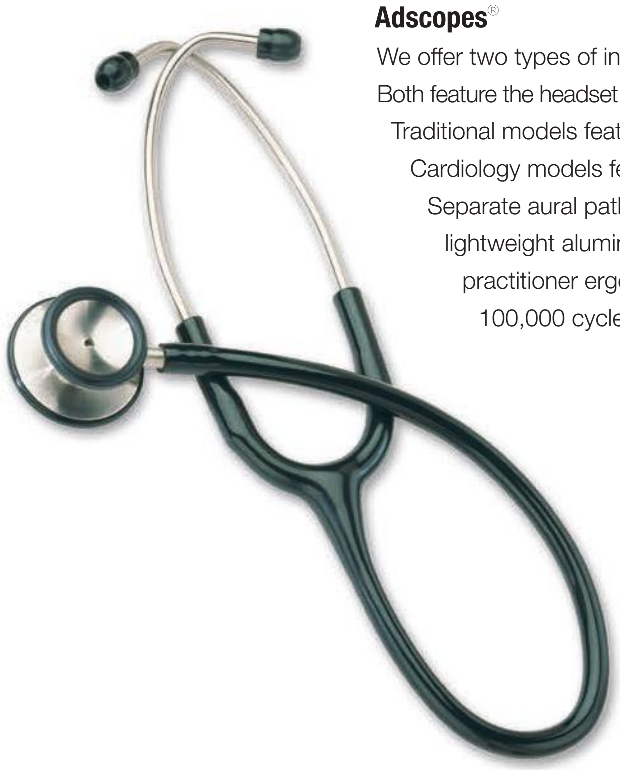
Although the Sprague scope is an industry standard offered by a number of importers only ADC's Adscope® Sprague offers a unique combination of patented and proprietary features that distinguish it from the competition.

Our patented valve mechanism virtually eliminates acoustic leakage. Our gasketed chestpiece drum does double duty improving both chestpiece acoustic seal and the security of the various chestpiece fittings.

Finally, our unique chestpiece "key" allows the diaphragms to be more easily serviced. Each Sprague is inspected prior to packaging in our New York facility. Every single one.

Adscopes®

We offer two types of internal spring binaural/tubing assemblies on our Adscopes®. Both feature the headset fixed at 15° forward for an anatomically correct fit and improved acoustic seal. Traditional models feature a single lumen with reinforcing yoke to improve durability. Cardiology models feature a bi-lumen design for improved stereo separation of the channels. Separate aural paths also help eliminate sound clutter. Aural tubes are machined from either lightweight aluminum alloy or special stainless steel that is up to 30% lighter for improved practitioner ergonomics and comfort. The concealed tensioning spring is tested up to 100,000 cycles to ensure a lifetime of use.

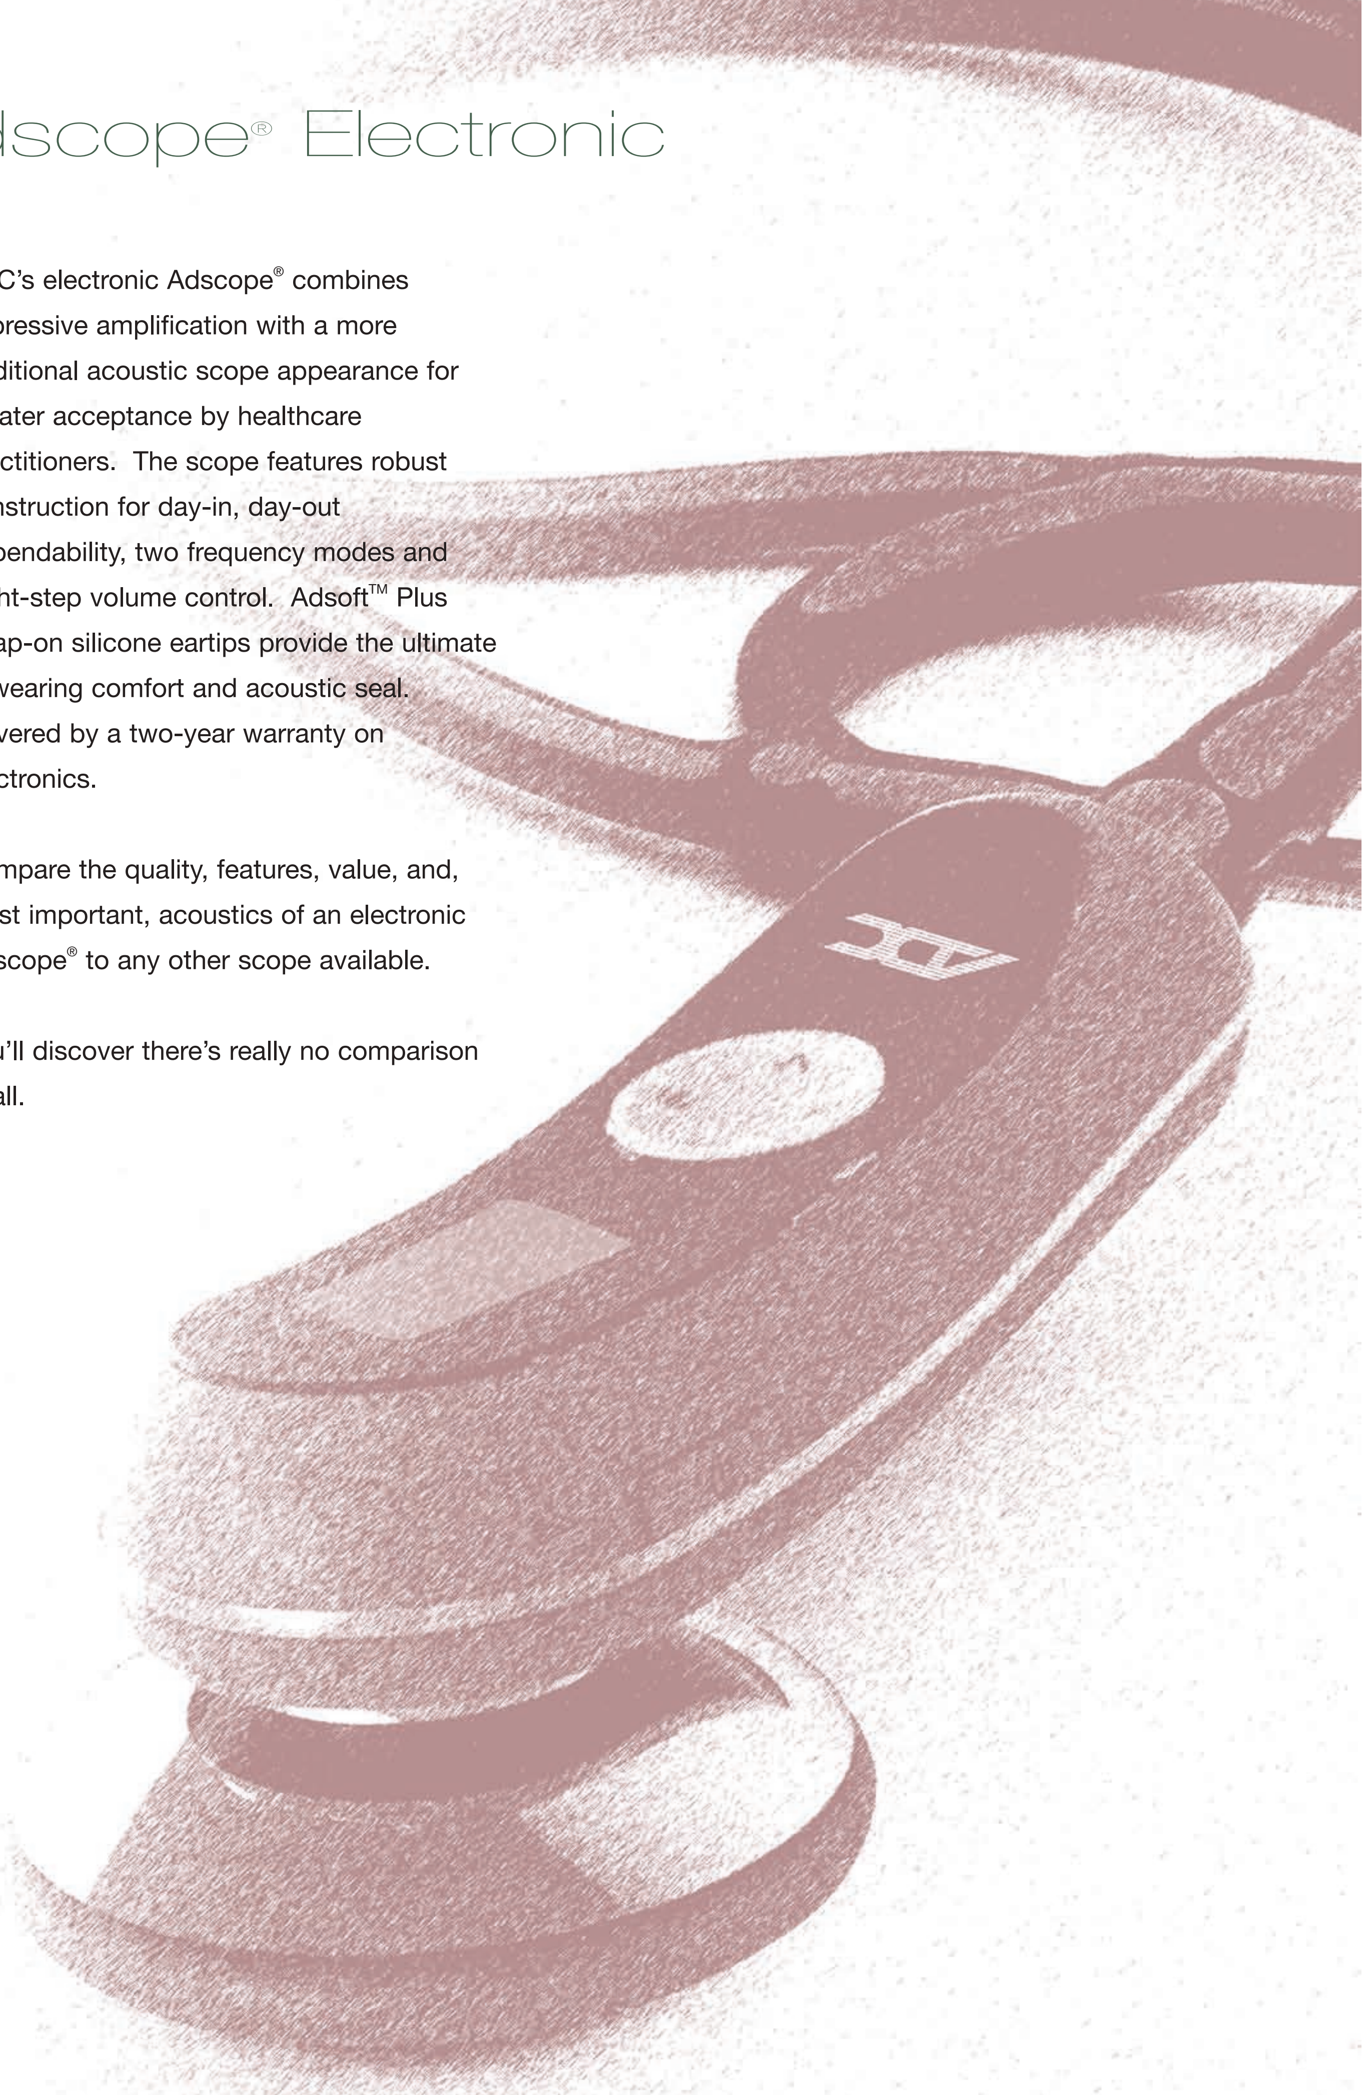


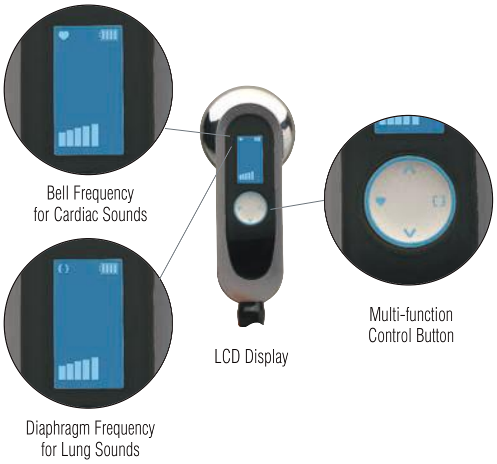
Adscope® Electronic

ADC's electronic Adscope® combines impressive amplification with a more traditional acoustic scope appearance for greater acceptance by healthcare practitioners. The scope features robust construction for day-in, day-out dependability, two frequency modes and eight-step volume control. Adsoft™ Plus Snap-on silicone eartips provide the ultimate in wearing comfort and acoustic seal. Covered by a two-year warranty on electronics.

Compare the quality, features, value, and, most important, acoustics of an electronic Adscope® to any other scope available.

You'll discover there's really no comparison at all.





Bell Frequency for Cardiac Sounds
Diaphragm Frequency for Lung Sounds
LCD Display
Multi-function Control Button

Adscope® 658 Electronic Scope

Our fourth-generation electronic stethoscope combines impressive acoustic amplification, electronic noise filtering, enhanced durability, and ergonomic comfort.

The 658 features

- Amplification up to 18 times (24db) over traditional acoustic scopes
- Patented piezopolymer film contact microphone for wider frequency response versus acoustic microphones used in competing models
- Two frequency modes: bell (15-200Hz) for cardiac sounds and diaphragm (100-500Hz) for lung sounds
- Eight-level volume control
- Holds last mode and volume settings for convenience
- Auto shut-off after three minutes for extended battery life
- LCD display with mode, battery strength, and volume settings
- Cardiology headset with large-bore stainless-steel binaurals
- Adsoft™ Plus snap-on silicone eartips for the ultimate in wearing comfort and acoustic seal
- Lightweight and compact, weighing less than 6 oz and measuring 30”
- Lithium ion battery provides 20 hours continuous use (about 400 exams at three minutes per exam)
- Assembled, inspected, and packaged in the USA
- Includes USB cord (for charging), scope ID tag, and spare Adsoft™ Plus eartips
- Two-year warranty on electronics, lifetime warranty on headset

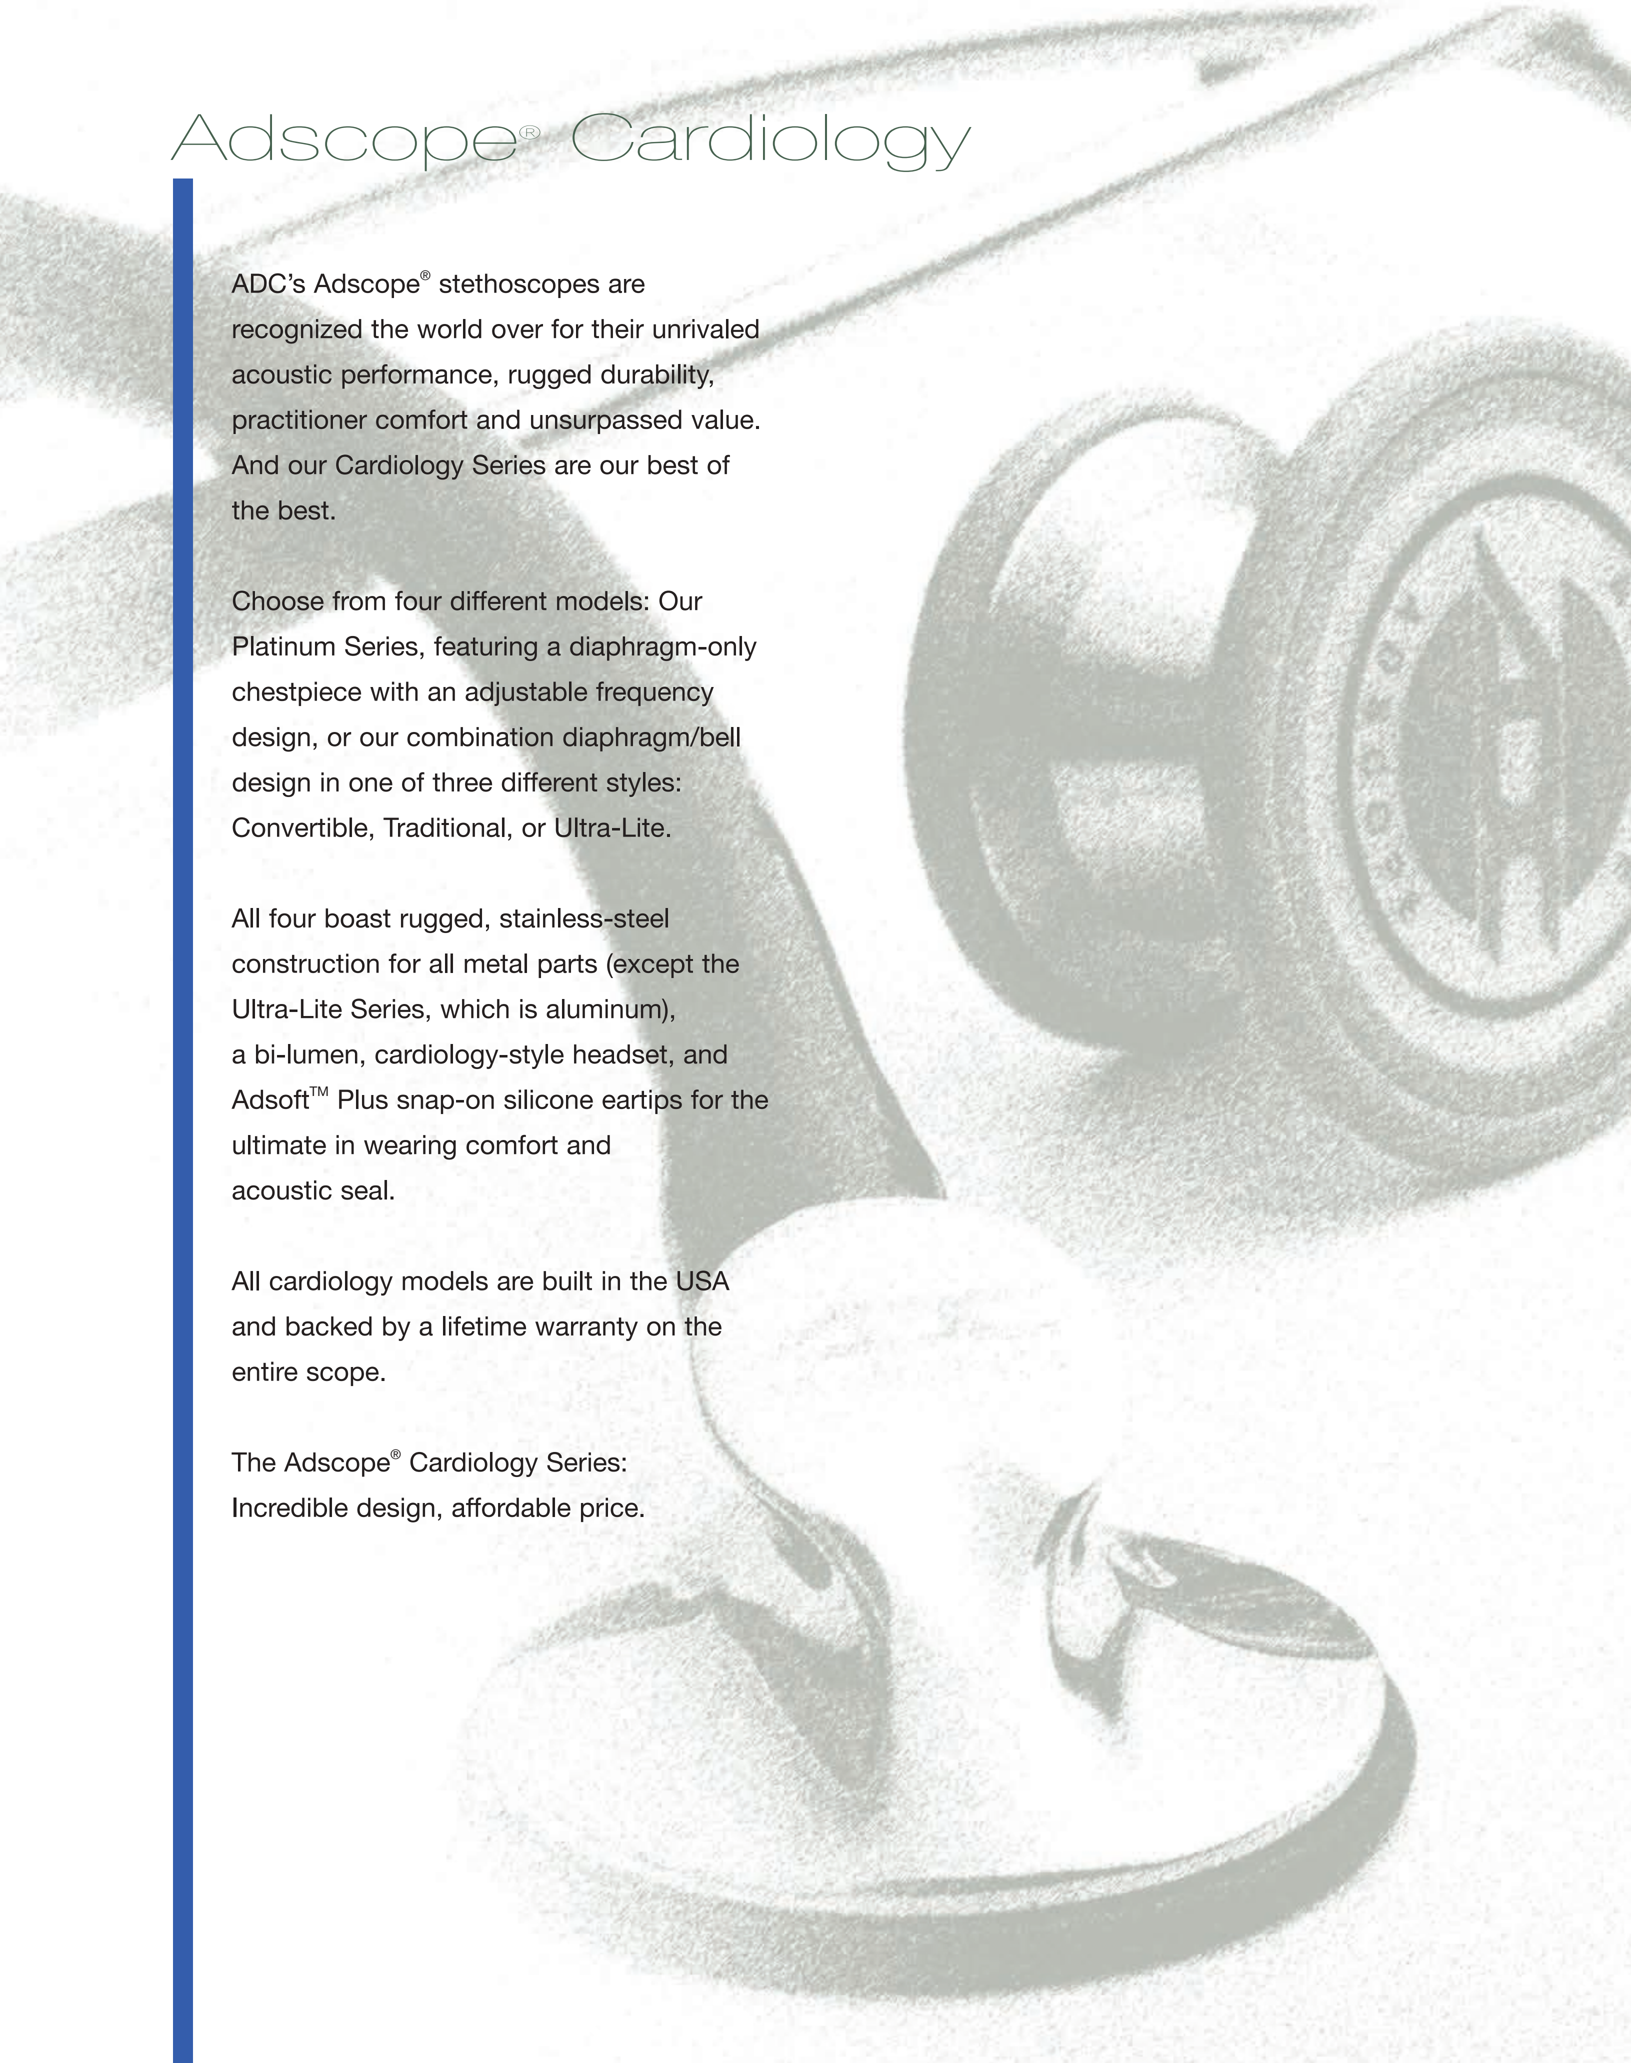
Adscope® Cardiology



ADC's Adscope® stethoscopes are recognized the world over for their unrivaled acoustic performance, rugged durability, practitioner comfort and unsurpassed value. And our Cardiology Series are our best of the best.

Choose from four different models: Our Platinum Series, featuring a diaphragm-only chestpiece with an adjustable frequency design, or our combination diaphragm/bell design in one of three different styles: Convertible, Traditional, or Ultra-Lite.

All four boast rugged, stainless-steel construction for all metal parts (except the Ultra-Lite Series, which is aluminum), a bi-lumen, cardiology-style headset, and Adsoft™ Plus snap-on silicone eartips for the ultimate in wearing comfort and acoustic seal.

All cardiology models are built in the USA and backed by a lifetime warranty on the entire scope.

The Adscope® Cardiology Series:
Incredible design, affordable price.

Adscope® 600 Platinum Edition

AFD technology and a sculpted chestpiece make this the ultimate acoustic stethoscope.

The 600 series features

- ADC's adjustable frequency design (AFD) technology for the acoustic response of a traditional bell and diaphragm in a convenient one-sided chestpiece
- Light pressure for low, bell-type frequency, firm pressure for high, diaphragm-type frequency
- Sculpted chestpiece precisely CNC machined to exacting tolerances from surgical stainless steel for outstanding performance, rugged durability, and impressive ergonomics
- Non-chill diaphragm retaining rim for patient comfort
- Cardiology headset with large-bore stainless-steel binaurals, fixed at a 15° angle to maximize comfort and acoustic seal
- Bi-lumen (dual bore) 19" PVC tubing stays soft and flexible
- Adsoft™ Plus snap-on silicone eartips for the ultimate in wearing comfort and acoustic seal
- Tactical model uses black anodized aluminum aural tubes
- Accessory kit includes additional Adsoft™ Plus eartips and scope ID tag
- Weighs 7.15 oz. (203 g)
- Overall length 27"
- Assembled, inspected, and packaged in the USA
- Lifetime warranty

AFD Technology Diaphragm

Adscope® 601 Convertible

Combining AFD technology with a convertible design makes this the most versatile of our cardiology scopes.

The 601 series features

- Convertible chestpiece for adult diaphragm/bell or adult/pediatric diaphragm configurations
- ADC's adjustable frequency design (AFD) technology provides enhanced acoustic response in both adult and pediatric diaphragm
- Stainless-steel chestpiece and aural tube construction (tactical model has aluminum binaurals)
- Extra-deep bell for unsurpassed low-frequency response
- Non-chill bell and diaphragm retaining rims for patient comfort
- Cardiology headset with large-bore stainless-steel binaurals fixed at a 15° angle to maximize comfort and acoustic seal
- Bi-lumen (dual bore) 19" PVC tubing stays soft and flexible
- Adsoft™ Plus snap-on silicone eartips for the ultimate in wearing comfort and acoustic seal
- Includes accessory kit with adult bell chestpiece, extra Adsoft™ Plus eartips, and scope ID tag
- Weighs 7.57 oz (214.6 g) with adult bell and 8.57 oz (243 g) with pediatric diaphragm
- Overall length 28"
- Assembled, inspected, and packaged in the USA
- Lifetime warranty

Convert pediatric diaphragm to adult bell in seconds.

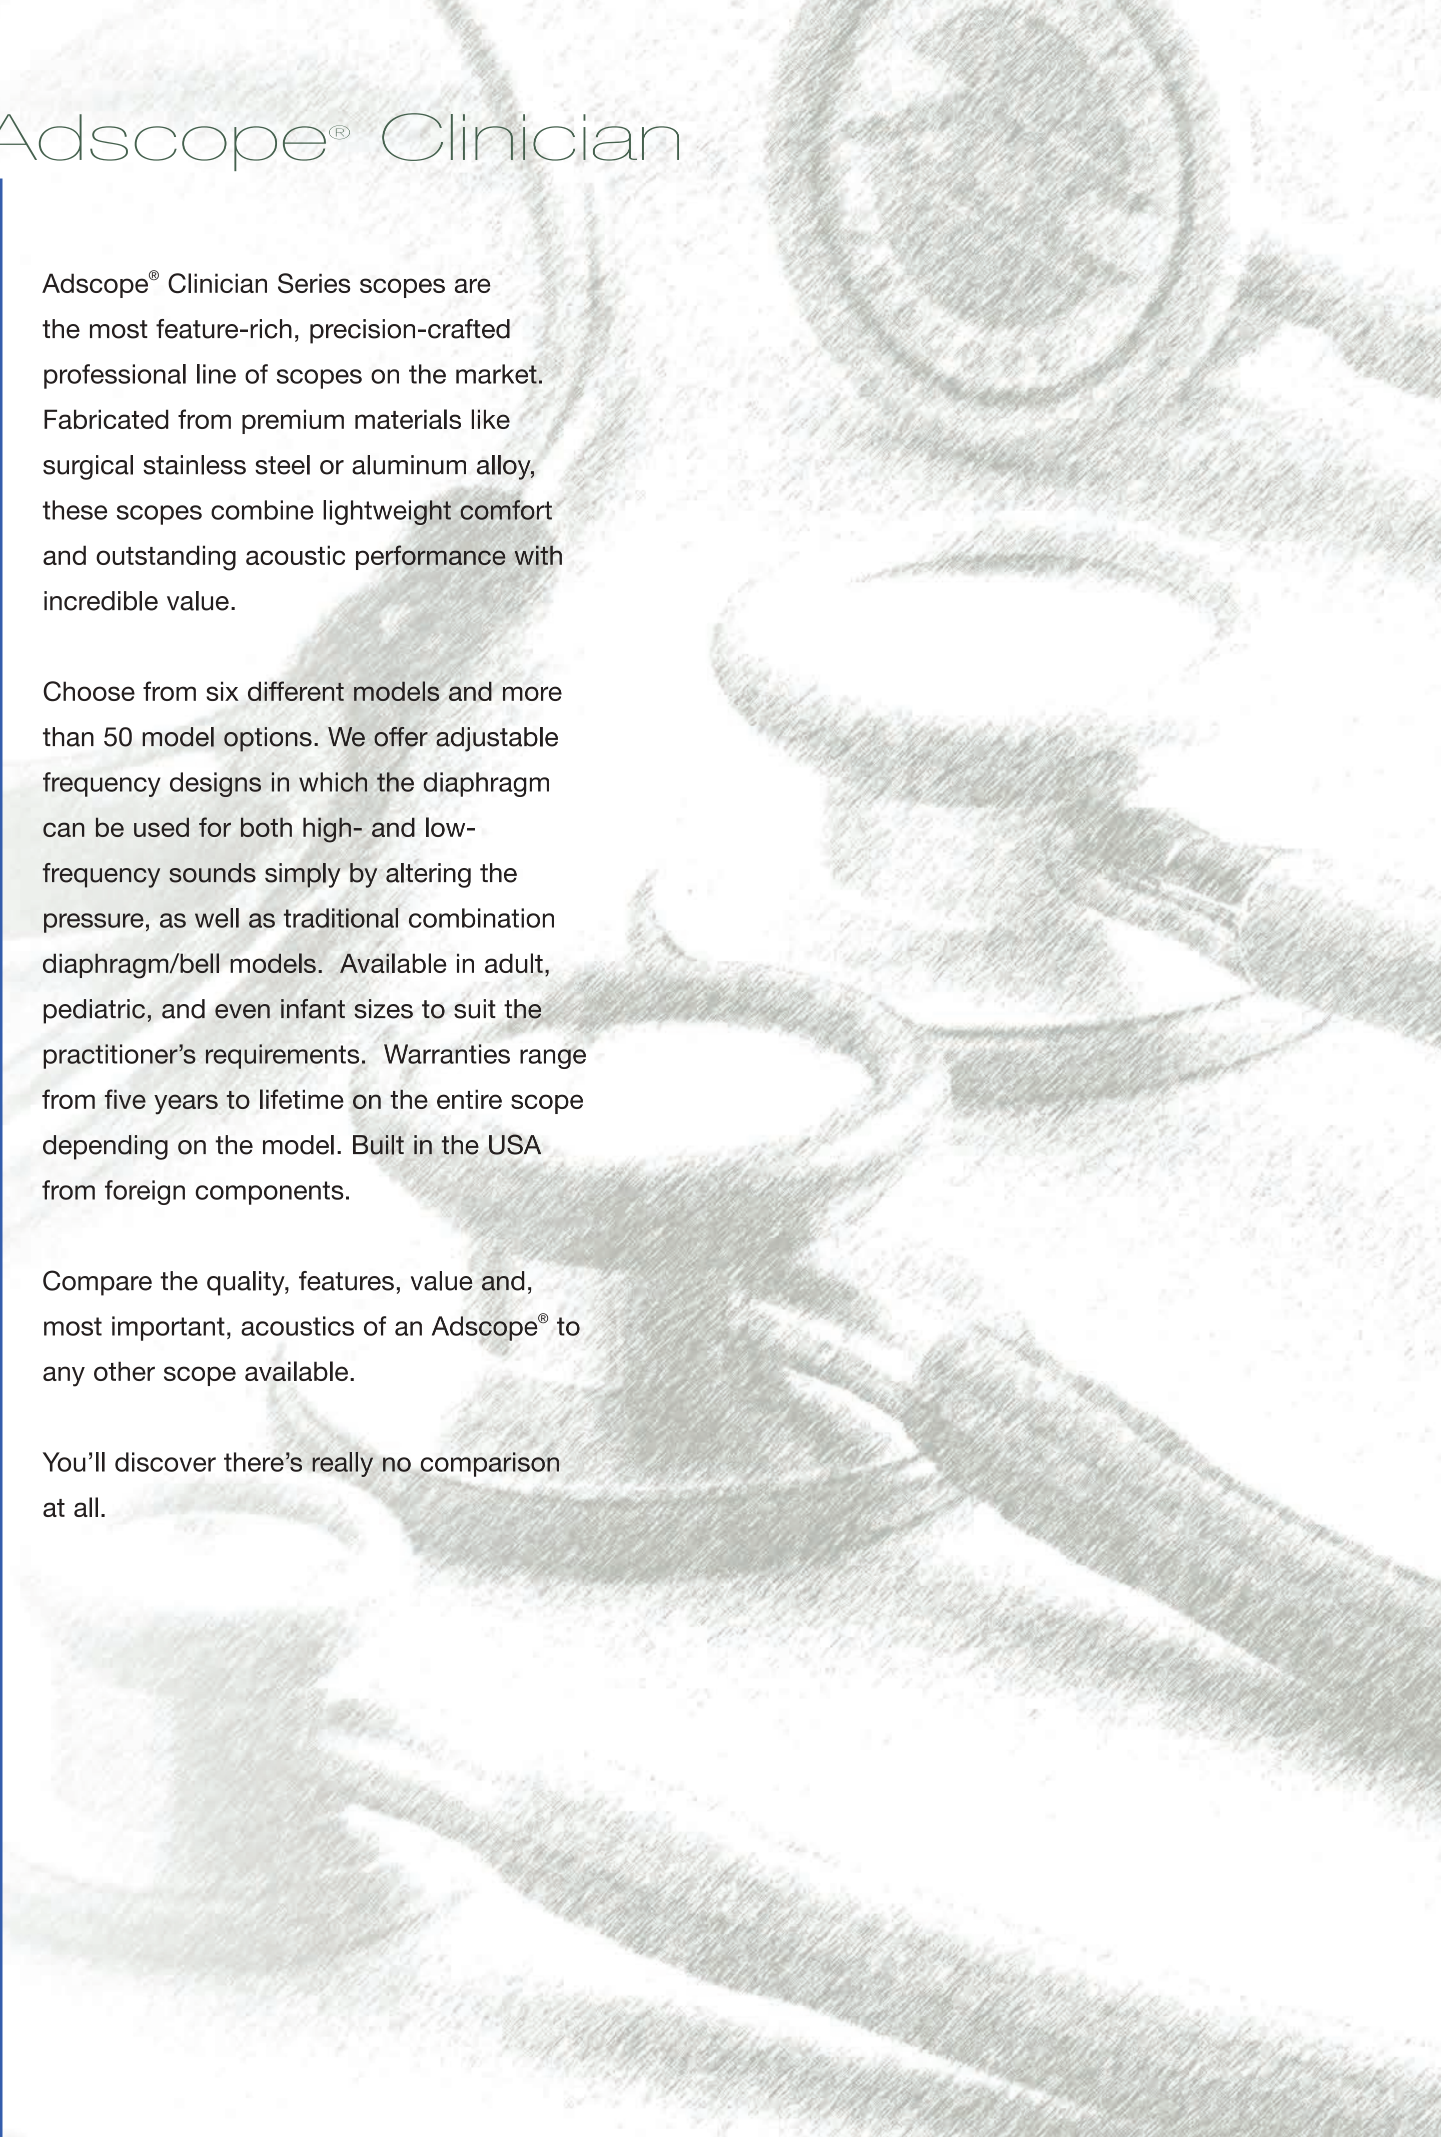
Adscope® Clinician



Adscope® Clinician Series scopes are the most feature-rich, precision-crafted professional line of scopes on the market. Fabricated from premium materials like surgical stainless steel or aluminum alloy, these scopes combine lightweight comfort and outstanding acoustic performance with incredible value.

Choose from six different models and more than 50 model options. We offer adjustable frequency designs in which the diaphragm can be used for both high- and low-frequency sounds simply by altering the pressure, as well as traditional combination diaphragm/bell models. Available in adult, pediatric, and even infant sizes to suit the practitioner's requirements. Warranties range from five years to lifetime on the entire scope depending on the model. Built in the USA from foreign components.

Compare the quality, features, value and, most important, acoustics of an Adscope® to any other scope available.

You'll discover there's really no comparison at all.

AFD Technology Diaphragm

Adscope® 615ST - Tactical

Adscope® 615 Platinum Professional Edition

With AFD technology and an oversized ovoid chestpiece, the 615 is our finest Clinician Series stethoscope.

The 615 series features

- ADC's adjustable frequency design (AFD) technology provides the acoustic response of a traditional bell and diaphragm in a convenient one-sided chestpiece
- Light pressure for low, bell-type frequency, firm pressure for high, diaphragm-type frequency
- Oversized ovoid-shaped chestpiece enhances acoustic performance while improving ergonomics
- Sculpted chestpiece machined from zinc alloy plated with an attractive satin stainless finish
- Non-chill diaphragm retaining rim for patient comfort
- Clinician headset boasts reinforcing yoke molded into the flexible 22" PVC tubing
- Stainless-steel binaurals fixed at 15º angle for greater comfort
- Adsoft™ Plus snap-on silicone eartips for the ultimate in wearing comfort and acoustic seal

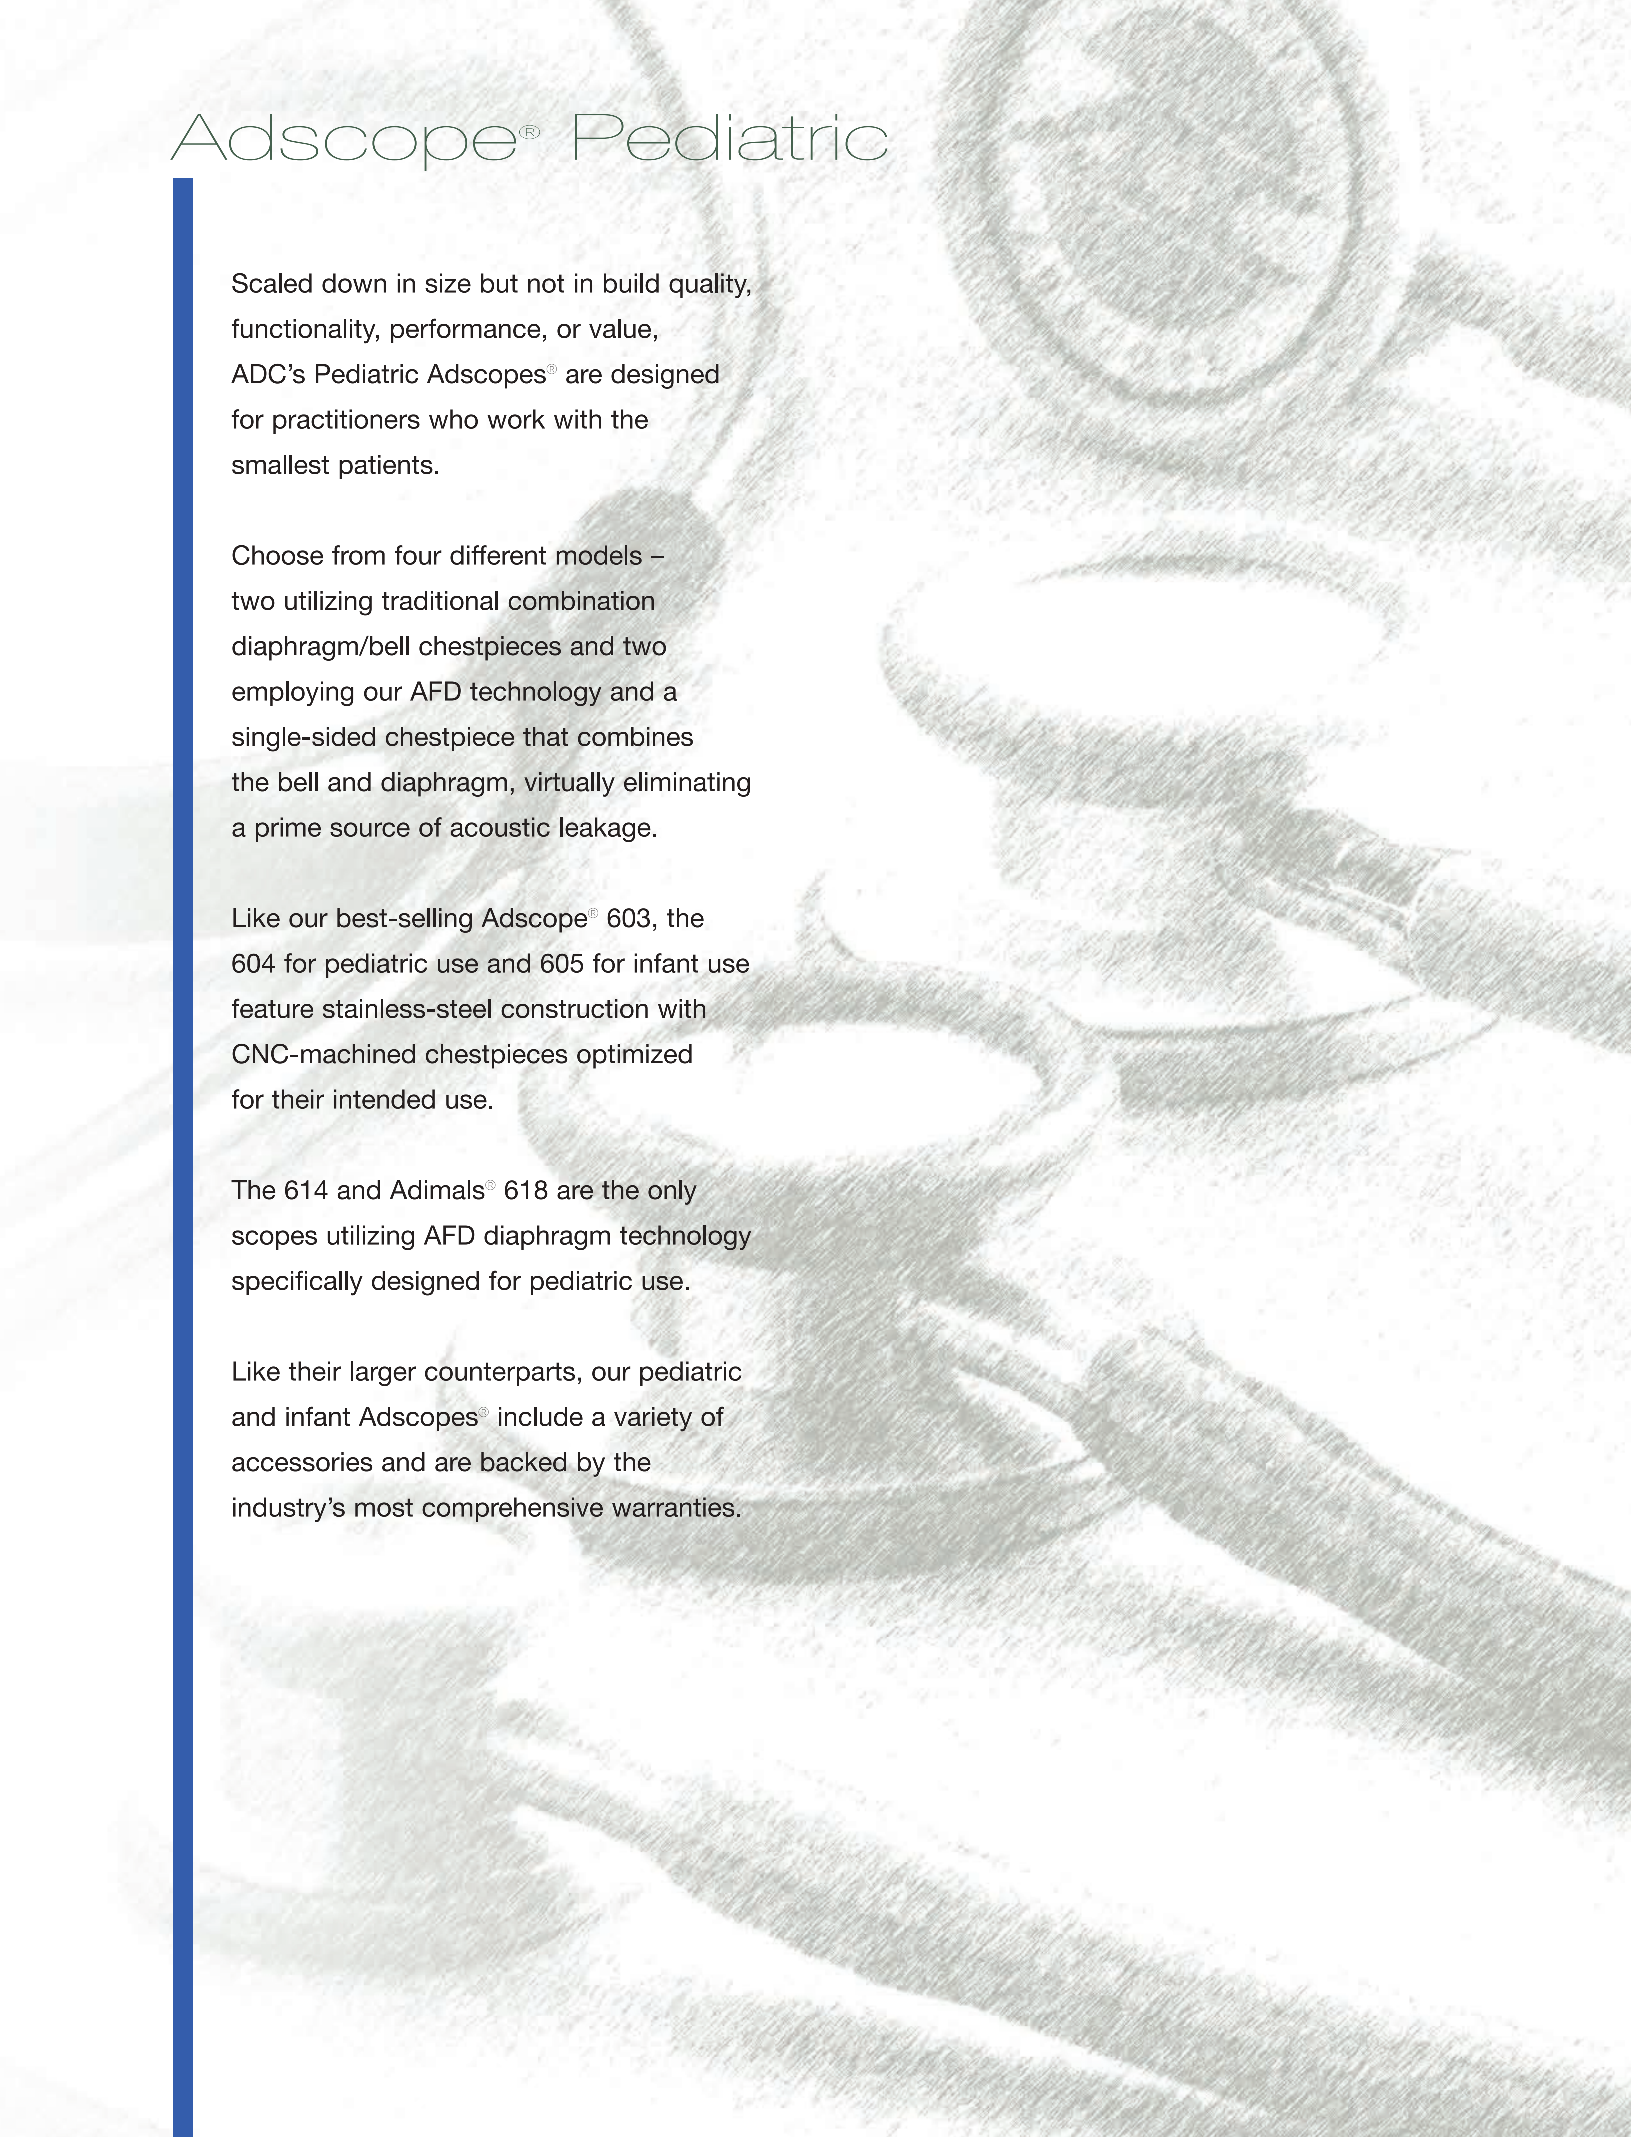
Adscope® Pediatric



Scaled down in size but not in build quality, functionality, performance, or value, ADC's Pediatric Adscopes® are designed for practitioners who work with the smallest patients.

Choose from four different models – two utilizing traditional combination diaphragm/bell chestpieces and two employing our AFD technology and a single-sided chestpiece that combines the bell and diaphragm, virtually eliminating a prime source of acoustic leakage.

Like our best-selling Adscope® 603, the 604 for pediatric use and 605 for infant use feature stainless-steel construction with CNC-machined chestpieces optimized for their intended use.

The 614 and Adimals® 618 are the only scopes utilizing AFD diaphragm technology specifically designed for pediatric use.

Like their larger counterparts, our pediatric and infant Adscopes® include a variety of accessories and are backed by the industry's most comprehensive warranties.

AFD Technology Diaphragm

Adscope® 614

A pediatric stethoscope with AFD technology.

The 614 series features

- ADC's adjustable frequency design (AFD) pediatric diaphragm combines the acoustic response of a traditional bell and diaphragm into a convenient one-sided chestpiece
- Light pressure for low, bell-type frequency, firm pressure for high, diaphragm-type frequency
- Sculpted 1" diameter chestpiece machined from lightweight zinc alloy with an attractive satin finish
- Non-chill diaphragm retaining rim for patient comfort
- Clinical headset boasts reinforcing yoke molded into flexible 22" PVC tubing
- Lightweight aluminum binaurals in matching satin finish
- Adsoft™ Plus snap-on silicone eartips for the ultimate in wearing comfort and acoustic seal
- Accessory kit with spare Adsoft™ Plus eartips and a scope ID tag

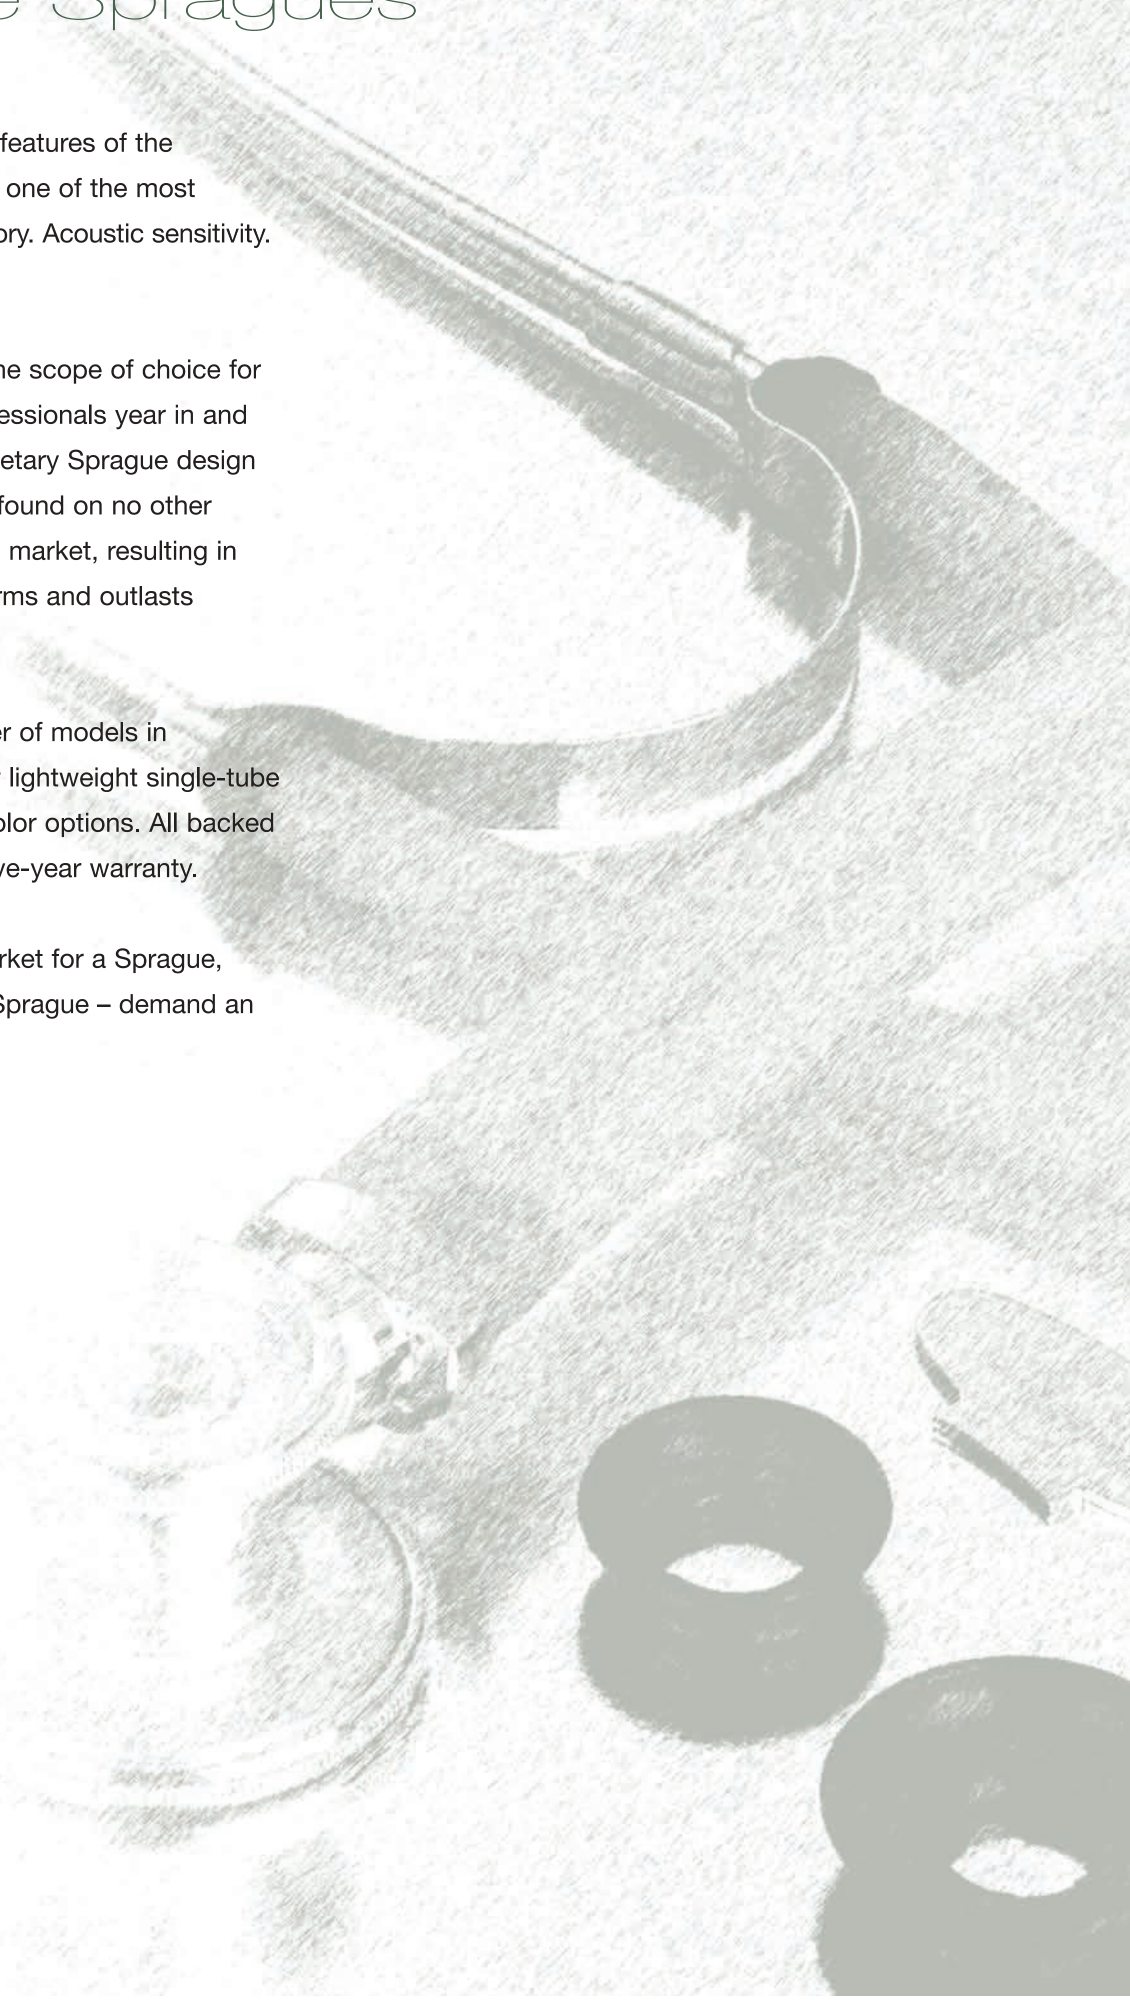
Adscope® Spragues

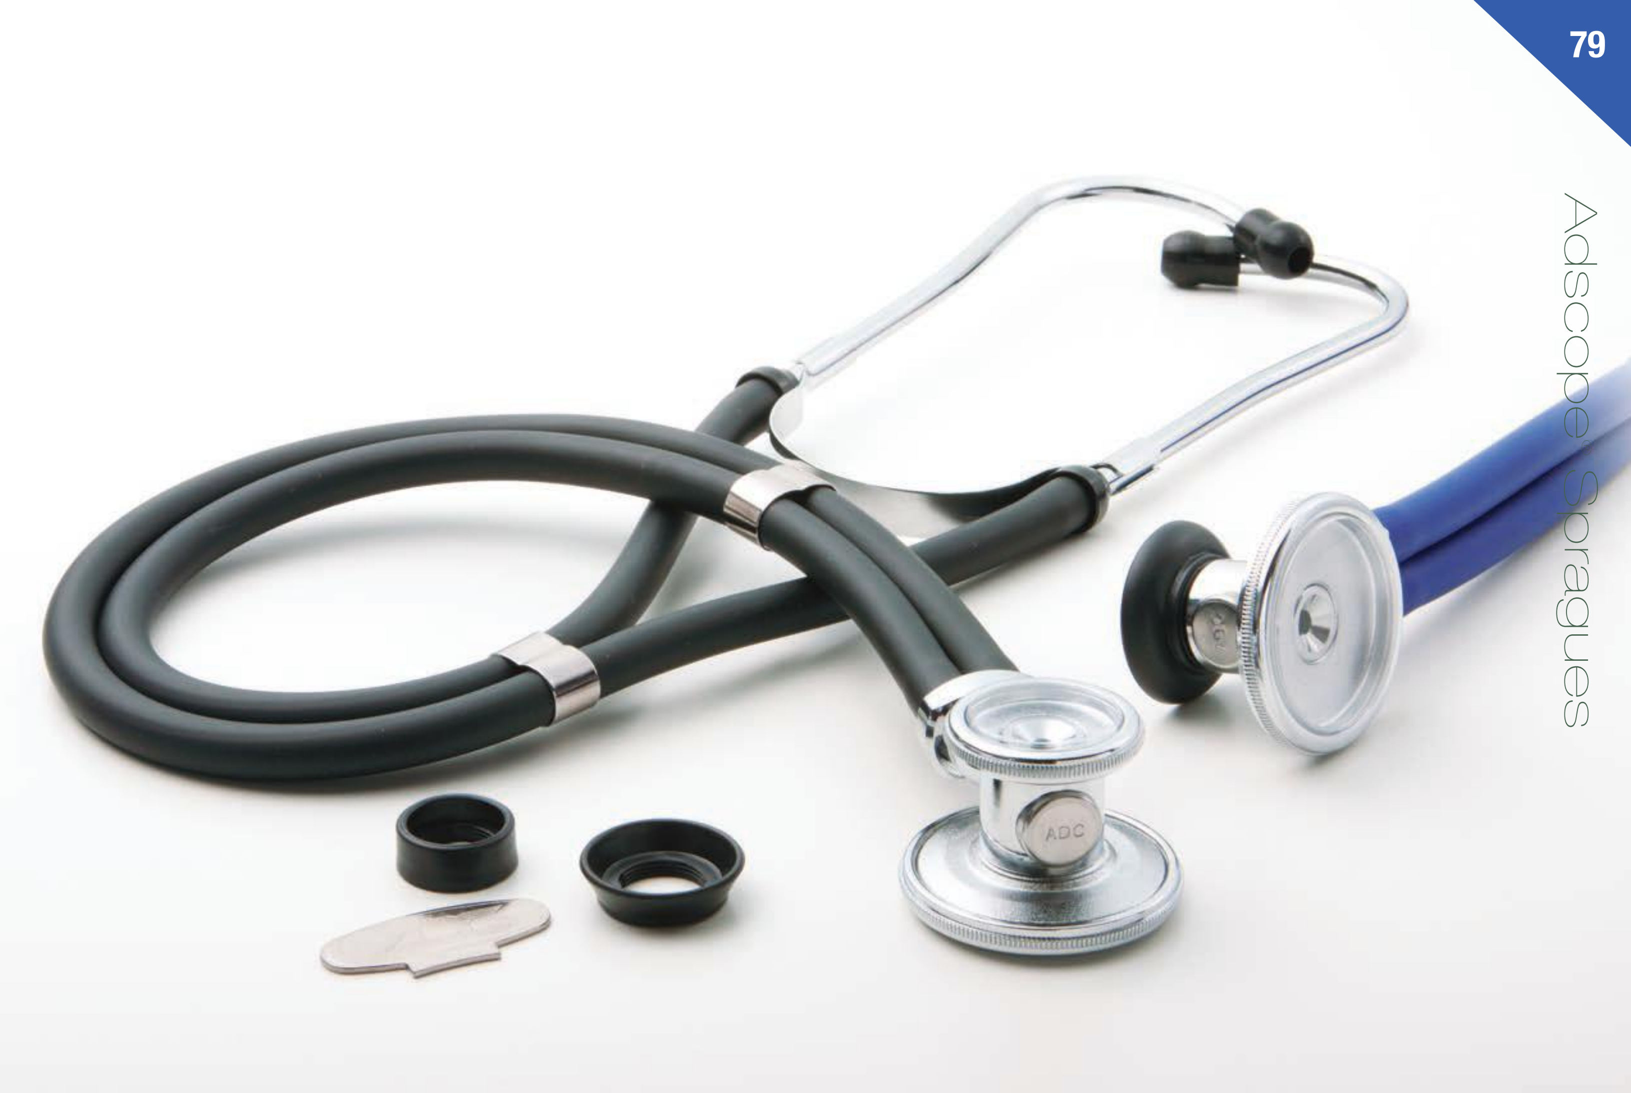
The legendary design features of the Sprague have made it one of the most popular scopes in history. Acoustic sensitivity. Unrivaled versatility.

No wonder it’s been the scope of choice for EMS and nursing professionals year in and year out. ADC’s proprietary Sprague design incorporates features found on no other Sprague scope on the market, resulting in a scope that outperforms and outlasts look-alikes.

Choose from a number of models in traditional two-tube or lightweight single-tube design in dozens of color options. All backed by ADC’s no-hassle five-year warranty.

So, if you’re in the market for a Sprague, demand not just any Sprague – demand an Adscope® Sprague.





Pediatric
Configuration

Chestpiece
Key

Adscope® 641 Sprague Scope

Why own just a Sprague stethoscope when you can own an Adscope® Sprague?

The ADC Sprague features

- Threaded chestpiece drum of chrome-plated zinc permits the use of five interchangeable chestpiece fittings – an adult and pediatric diaphragm, and three bells (1¼", 1", ¾") – for complete diagnostic capability on most patients
- Double-tube configuration
- Proprietary valve mechanism eliminates acoustic leakage
- Adjustable aluminum binaurals with Adsoft™ Sprague eartips
- Convenient 22" tubing length in choice of 29 fashion tubing colors
- Complete with an accessory pouch containing the bell chestpieces, chestpiece key, two spare diaphragms, one pair of clear eartips, and one pair of black eartips
- Weighs 7 oz (198 g)
- Overall length 30"
- Five-year warranty
- Inspected and packaged in the USA

ADC's legendary Sprague with a lightweight, single-tube design for greater comfort and convenience.

The 647 features

- Threaded chestpiece drum permits the use of five interchangeable chestpiece fittings – an adult and pediatric diaphragm and three bells (1¼", 1", ¾") – for complete diagnostic capability in most patients
- Extra-thick "Y" tubing
- Proprietary valve mechanism eliminates acoustic leakage
- Adjustable aluminum binaurals with Adsoft™ Sprague eartips
- Complete with an accessory pouch containing the bell chestpieces, chestpiece key, two spare diaphragms, one pair of clear eartips, and one pair of black eartips
- Weighs 7 oz (198.4 g)
- Overall length 31.5"
- Inspected and packaged in the USA

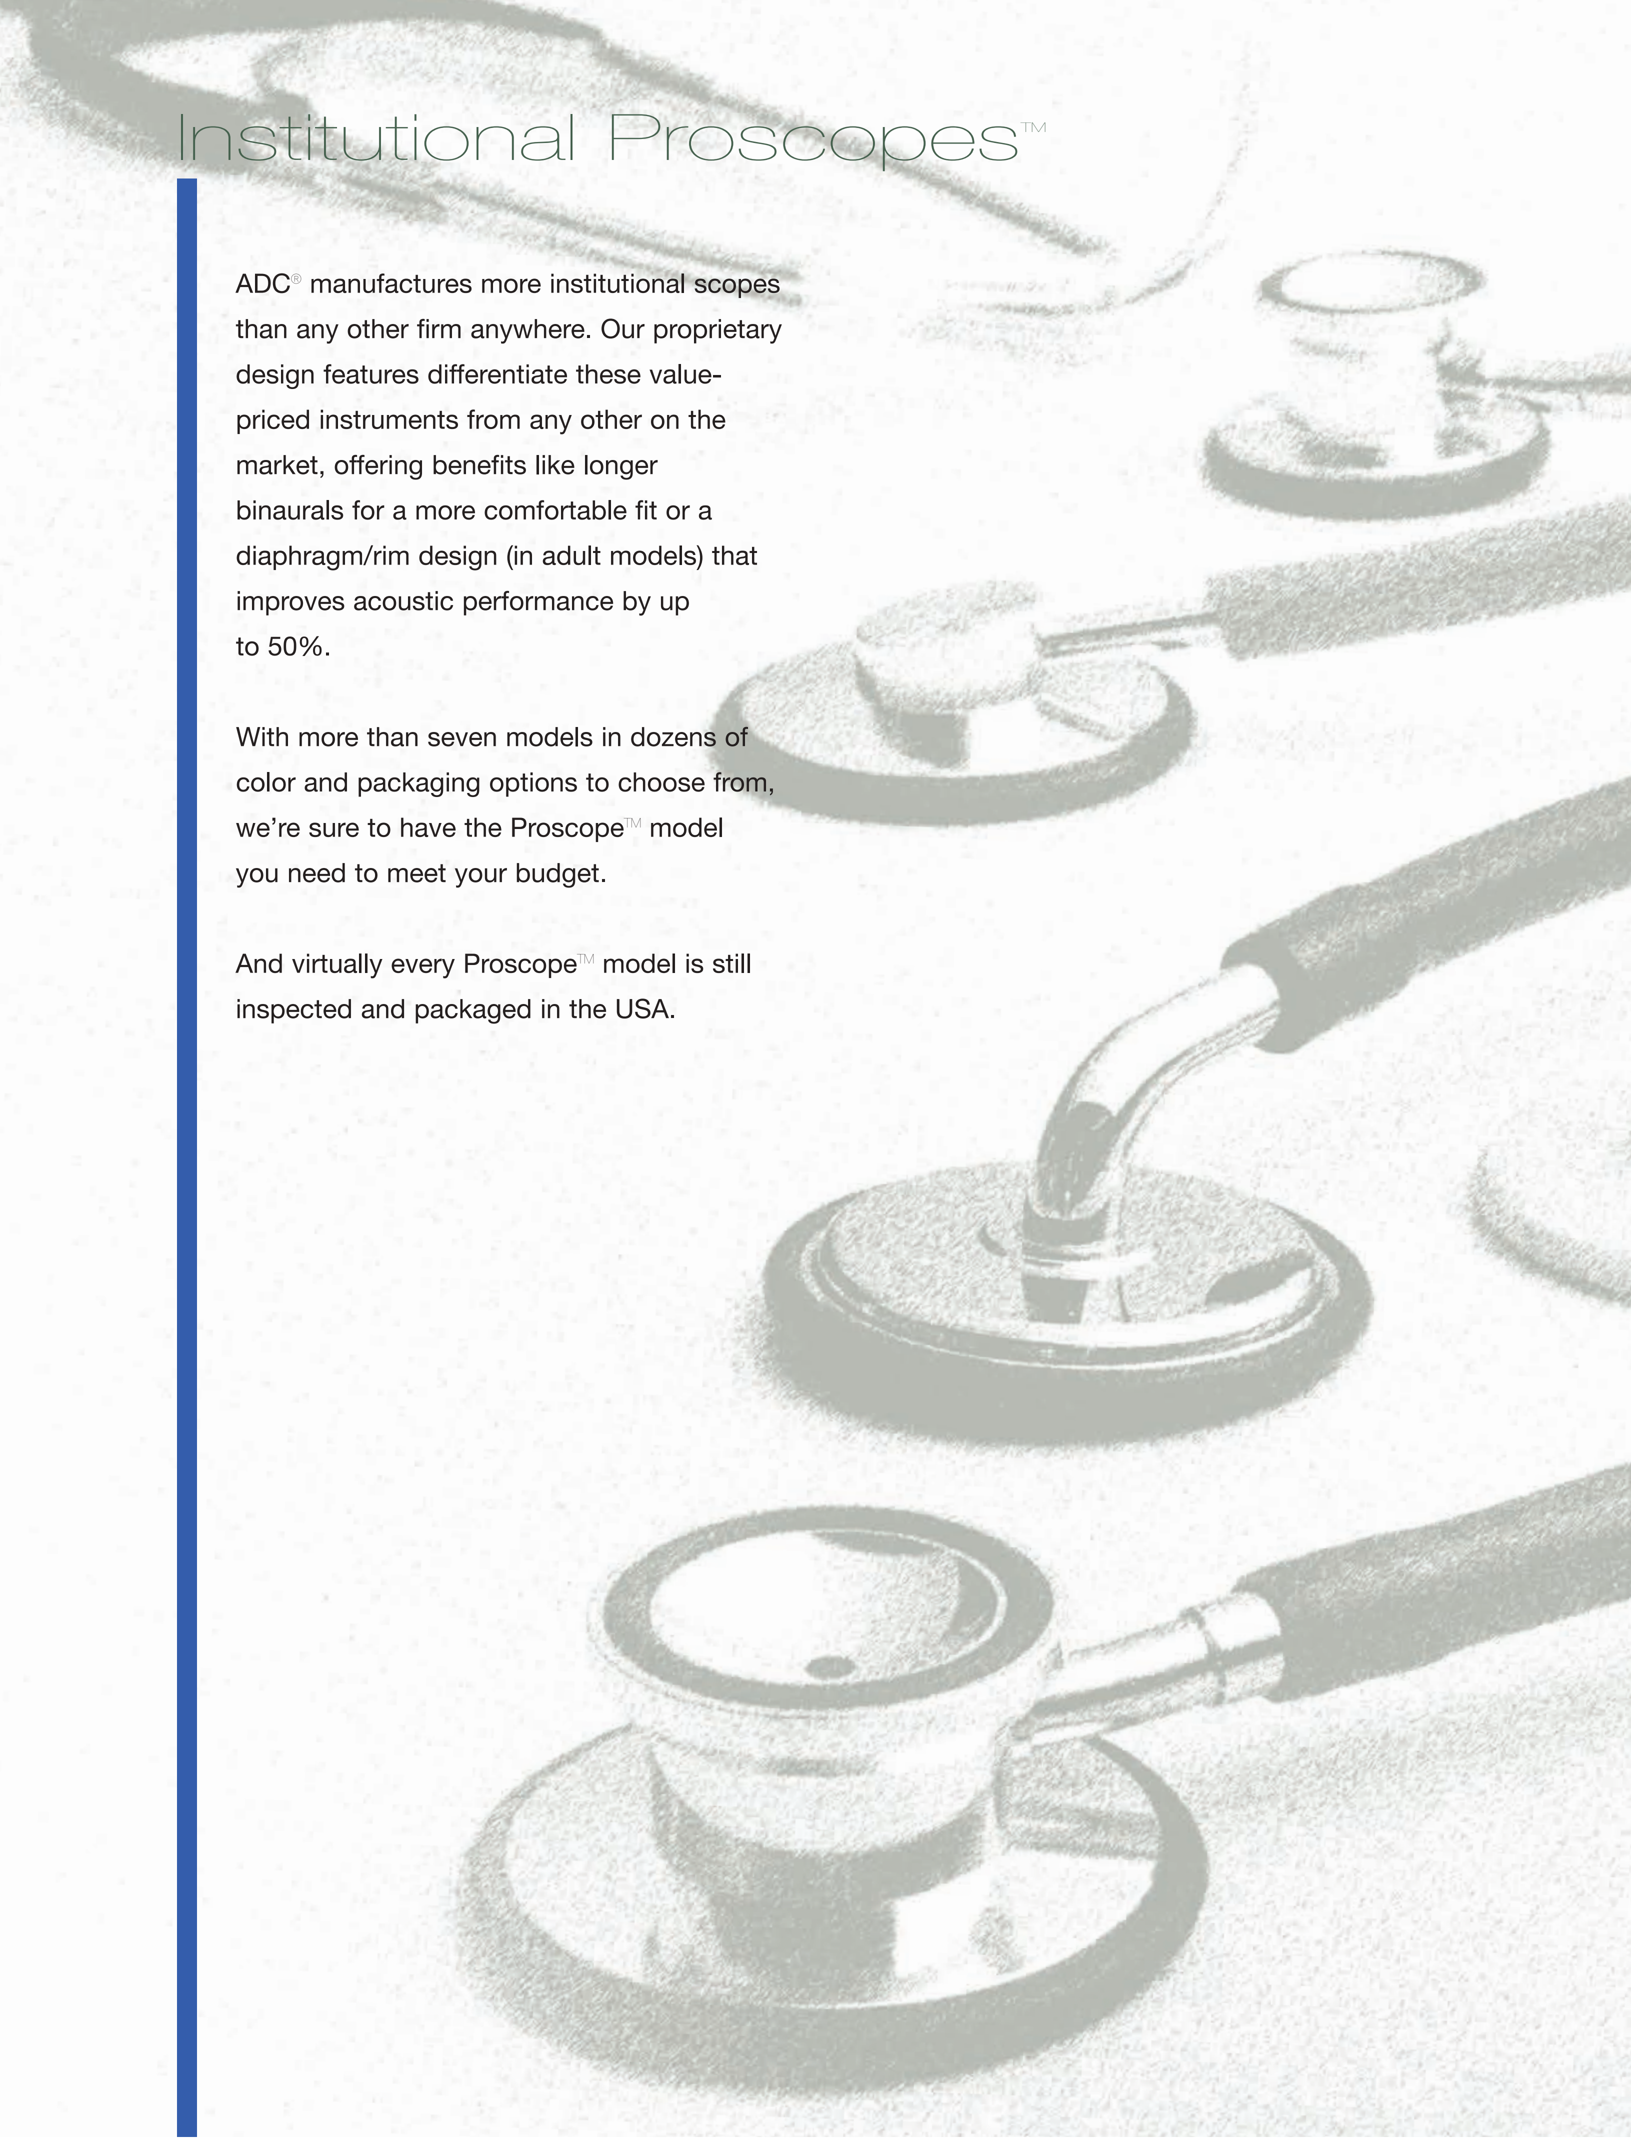
Institutional Proscopes™



ADC® manufactures more institutional scopes than any other firm anywhere. Our proprietary design features differentiate these value-priced instruments from any other on the market, offering benefits like longer binaurals for a more comfortable fit or a diaphragm/rim design (in adult models) that improves acoustic performance by up to 50%.

With more than seven models in dozens of color and packaging options to choose from, we're sure to have the Proscope™ model you need to meet your budget.

And virtually every Proscope™ model is still inspected and packaged in the USA.

Proscopes™

Combining lightweight comfort with sensitive acoustics, ADC Proscopes™ are an ideal general-exam scope for the institutional setting.

The Proscope™ series features

- Choice of four models: diaphragm-only adult, combination diaphragm/bell adult, pediatric, and infant
- Proprietary diaphragm enhances acoustic response by up to 50% over competing designs
- Adjustable, lightweight extra-long aluminum binaurals with threaded PVC eartips
- Phthalate-free tubing in choice of 20 colors facilitates departmental coding
- Spare pair of black, mushroom push-on eartips
- Inspected and packaged in the USA
- One-year warranty

Teaching Scopes

Available in both our premium Adscope® and institutional Proscope™ series, ADC® teaching scopes provide two headsets to allow teacher and student to listen simultaneously.

The Adscope® teaching scope utilizes our legendary 603 series stainless-steel scope with a black teaching and royal blue student headset.

The Proscope™ teaching scopes are available in the diaphragm-only 660 series, or combination diaphragm/bell 670 series. Each offers two sets of binaurals.

Why settle for any teaching scope when you can have teaching scopes made from the world's best-selling line of stethoscopes?

Double leaf spring with
reinforcing yoke

AFD Technology
Diaphragm

Adscope® 613 Teaching Scope

A premium teaching scope built from Adscope® components.

Adscope® 613 teaching scope features

- Combination diaphragm/bell chestpiece precisely machined to exacting tolerances from surgical stainless steel for outstanding performance and rugged durability
- Extra-large bell (1⅜" diameter) for unsurpassed low-frequency response
- Ultra-sensitive diaphragm (1⅞" diameter) with adjustable frequency design (AFD) technology for greater amplification and crisper high-frequency response
- Non-chill bell and diaphragm retaining rims for patient comfort
- Two clinical headsets, both with reinforcing yoke molded into the flexible 22" PVC tubing and stainless-steel binaurals fixed at 15° angle for greater comfort
- Adsoft™ Plus silicone eartips for the ultimate in wearing comfort and acoustic seal
- Includes accessory kit with extra Adsoft™ Plus snap-on silicone eartips and scope ID tag
- Weighs 9.4 oz (266.5 g)
- Overall length 43"

Scope Accessories

An indispensable selection of accessories for your ADC® Adscope® or Proscope™ stethoscope.

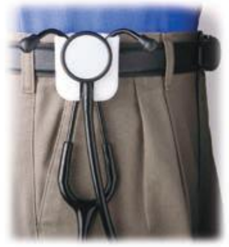
Tired of wearing your scope around your neck or trying to wedge it into a uniform pocket?

Our Hip Clip is an innovative, compact stethoscope holder that clips onto the belt, uniform, or scrubs, keeping the scope secure yet instantly accessible.

Does your scope look too much like those of your colleagues? Our scope ID tags clip onto scope tubing allowing you to identify and protect your investment.

Scope Hip Clip

A simple alternative to carrying your stethoscope.



The 218 Hip Clip features

- Lightweight plastic design
- Easy waistband clip
- Reduces neck strain and chest tenderness
- Frees use of hands
- Cleans easily
- Available in four colors
- Made in the USA

Infrared Thermometers

ADC® offers three models of infrared thermometers, two with tympanic technology and one that reads temperature from the middle of the forehead.

The original Adtemp™ 421 is a tympanic style designed for use without probe covers, making it ideal for homecare use. The Adtemp™ 424, also tympanic, uses low-cost, disposable probe covers and is perfect for the physician's office or clinic. Both units measure temperature in about one second, and both meet ASTM E1965-98 standards for accuracy.

Our new Adtemp™ 429 is a non-contact thermometer featuring an infrared sensor that reads temperature from the middle of the forehead. The easy-to-use unit offers an ideal mix of safety and convenience, providing one-second results with minimal risk of cross-contamination and no costly probe covers.

Adtemp™ 429 Non-Contact Thermometer

Easy-to-use infrared thermometer measures temperature instantly at the forehead! Convenient, non-contact measurement makes the Adtemp™ 429 the ideal instrument for use on all patients.

The Adtemp™ 429 infrared thermometer features

- One-second readings
- Large 6mm illuminated display
- °F/°C switchable display
- Switchable Human/Object modes
- Measuring range (Human)
  50.0°F - 122.0°F +/- .5°F (10°C - 50°C +/- .3°C)
- Measuring range (Object)
  32.0°F - 212.0°F +/- 1°F (0°C - 100°C +/- 1°C)
- 30-reading memory
- Night mode function mutes audibles for patient care
- Audible beep when measurement complete (except Night mode)
- Auto off conserves battery strength
- Compact, ergonomic design measures 5" (129.9 mm) long
- Weighs 3 oz (87g) including battery
- Powered by two 1.55V AAA alkaline batteries (included)

Adtemp™ 424 Infrared Ear Thermometer

Easy-to-use tympanic thermometer measures core temperature instantly. Convenient, economical probe covers make it the ideal instrument for use on all types of patients.

The Adtemp™ 424 Thermometer features

- One-second measurement using scan/peak technology
- Large 6mm illuminated display
- Temperature range from 89.6°F - 108°F +/- .4°F (32°C - 42.2°C +/- .2°C)
- °F/°C switchable display
- Fever alarm at 99.5°F (37.5°C)
- Last-reading memory
- Audible beep when measurement is complete
- Auto off conserves battery life
- Compact design: 5½" (13.97cm) long, weighs 1.6oz (45.3g) including battery
- Powered by 1.55V (CR2032) lithium battery (included)
- Includes 20 probe covers in convenient dispenser
- Desktop storage caddy

Adtemp™ 421 Digital Ear Thermometer

The most compact tympanic thermometer on the market.

The Adtemp™ 421 thermometer features

- Measures core temperature instantly from the ear reliably and accurately
- Measuring range (Human) 86.6°F-108°F ±0.4°F (32°C-42.2°C ±0.2°C)
- Measuring range (Object) 32°F-212°F ±0.4°F (0°C-100°C ±0.2°C)
- Probe-cover-FREE design is less costly and more convenient to use
- Large 6mm illuminated display is easy to read
- Compact 5" long (12.7 cm),1.9 oz (53.86g) ergonomic design fits comfortably in operator's hand and patient's ear
- Audible fever alarm at 99.5°F (37.5°C)
- 12-reading memory
- Complete with lithium battery, storage/travel case, and operating instructions

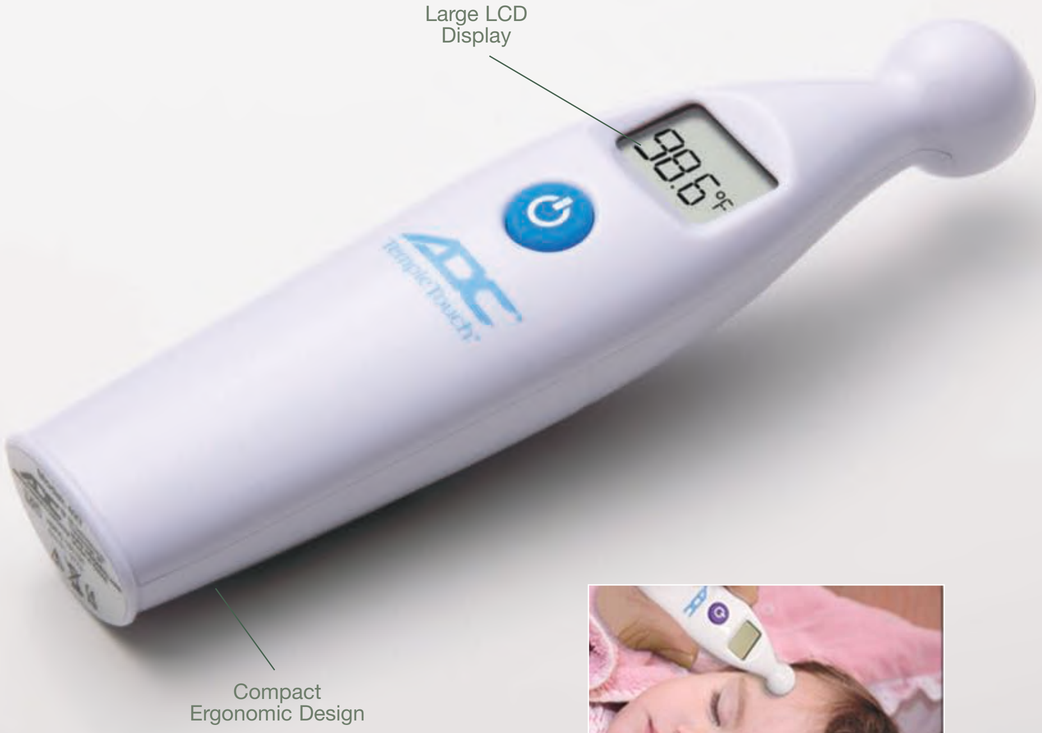
Digital Stick Thermometers

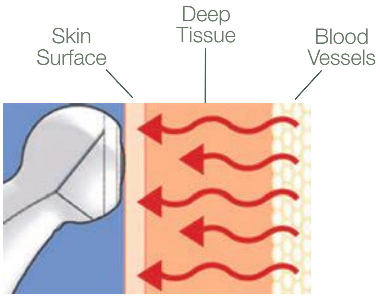
ADC offers one of the largest selections of cost-effective digital stick thermometers to meet virtually every clinical setting. Our selection and unmatched quality control are why Frost and Sullivan voted ADC's digital stick thermometer line the best in the US in 2006.

We offer nine distinct models in a variety of packaging options and price points. Choose from super-low-cost models that measure in 60 seconds to super-fast-read models that measure in as little as two seconds. We offer flexible tip models for pediatric patient safety and specialty models for hypothermia or veterinary use. Our revolutionary non-invasive, low-cost conductive model, the Adtemp™ Temple Touch, measures at the temple in just six seconds.

Adtemp™ universal thermometer sheaths, compatible with all ADC stick thermometers and most competing brands, are available in a number of packaging options.

All thermometer models offer convenient dual-scale readouts (C/F switchable), audible alerts, auto off, last-reading memory, and water resistance. All come complete with batteries and most are shipped with a supply of protective sheaths. Every ADC Adtemp™ stick thermometer meets the accuracy requirements for intermittent thermometers under ASTM E1112.





Adtemp™ 427 Temple Touch Thermometer

Provides an accurate six-second, non-invasive temperature reading at the temple making it ideal for pediatric patients. Cost-effective design makes it ideal for institutional use.

The Adtemp™ 427 Temple Touch features

- Non-invasive temple temperature measurement using patented conductive technology delivers clinically accurate readings in about six seconds
- Reduces the risk of cross contamination and avoids the need for costly probe covers
- Ideal for the hospital, clinic, or physician office
- Auto off function conserves battery life
- Audible tone when measurement is complete
- Last-reading memory
- Dual scale (°F/°C)
- Water resistant
- Large display
- Uses two AAA batteries (included)
  (Minimum 1000 full-duty cycles over 24-month period)
- Temperature range from 95°F to 107.6°F +/- .2°F (35°C to 42°C +/- .1°C)
- Compact design measures just 4.7" x 1.17" x 1"
  (12.0 cm x 3.0 cm x 2.4 cm)
- Weighs 1.3oz (37g), including batteries

Diagnostics

We offer EENT and physical-exam instruments in economical 2.5V and state-of-the-art 3.5V systems. Portable, pocket, desk, and wall configurations designed to meet virtually any budget or clinical setting.

Full-size instruments available in the most popular combinations including Otoscope, Ophthalmoscope, Otoscope/Ophthalmoscope set, or Complete Instrument set with nearly a dozen popular attachments. ADC's 2.5V Otoscope is available in a veterinary model, as well.

We also produce a halogen-illuminated Dermascope for examination of skin lesions.

ADC's Pocket Series Diagnostic Instruments include both an Otoscope and Ophthalmoscope. Xenon illumination and a compact size make these indispensable instruments for today's busy practitioner. Choose from more than a dozen model options. Available with hard or soft case. Some models are available with LED illumination.

All ADC Otoscopes will accommodate Welch Allyn® KleenSpec® disposable ear specula for the ultimate in convenience and affordability.

Full-size instruments are covered by a one-year warranty. Optics on pocket sets covered by a lifetime warranty.

Illumination – Options, Performance, Value

Our portable 2.5V instruments are available with low-cost vacuum lamps. Pocket instruments are equipped with Xenon or LED illumination for a brighter, whiter light (3200K).

Our 3.5V instruments are available with either Halogen/Xenon or state-of-the-art LED lighting for the ultimate performance.

Halogen
LED
Diagnostix

Halogen/Xenon combines the best of both inert gas technologies, providing a bright white light (3200K color temperature) with cooler operating temperatures.

But it is our third generation LED technology that takes lighting to a whole new level.

Our new AdLED™ provides near-perfect performance with a color temperature of 4200K, 17,000 lux, a > 90 color rendering index (CRI), and a life expectancy of 100,000 hours (compared with 20-30 hours for halogen). When combined with our Li-ion battery technology, it extends performance to levels never before achieved in an EENT instrument.

Halogen Illumination
LED Illumination

Adtronic™ Light Control

Our 2.5V portable instruments offer mechanical rheotstatic light control.

But it's our 3.5V instruments that really shine. Our patented Adtronic™ electronic rheostatic light output control provides infinite, continuously variable control – electronically. And because it's electronic we could build in an auto-off feature (after two minutes of inactivity) to further conserve battery strength and lamp life.

Comprehensive Warranties

Like all ADC warranties, our Diagnostix™ and Proscope™ brand EENT instrument warranties are the industry's most comprehensive.

- Proscope™ 2.5V Portable instruments are covered for one year.
- Diagnostix™ Pocket 2.5V instruments are covered for one year.
- Optical components are covered for life.
- Diagnostix™ 3.5V instrument heads, handles, and desk chargers are covered for two years.
- Diagnostix™ Adstation™ wall transformers and extension modules are covered for five years.
- Diagnostix™ AdLED™ lamps are covered for life.
- Special medical student warranty: Diagnostix™ 3.5V Portable Set warranties are covered through the second year of residency.

All ADC Otoscopes will accommodate Welch Allyn® KleenSpec® disposable ear specula for the ultimate in convenience and affordability.

Full size instruments covered by a one-year warranty. Optics on pocket sets covered by a lifetime warranty.

EENT Instrument Features

Sourced globally, assembled locally

We contract with the world's leading manufacturers to produce components to our exacting specifications. Then, using custom built inspection equipment, and factory-trained personnel, we subject those components to rigorous testing before the instruments are assembled and packaged in our New York facility.

We're one of the few firms to hold our own 510(k) and be classed as a manufacturer of EENT instruments.

Wide selection of instruments to meet virtually any need

We offer EENT and physical-exam instruments in economical 2.5V and state-of-the-art 3.5V systems. Portable, pocket, desk, and wall configurations are designed to meet virtually any budget or clinical setting.

More than 700 model options are possible. And all are backed by the industry's most comprehensive warranties.

Instrument heads for virtually any physical exam

We offer up to four different instrument heads: Otoscopes for examination of the inner ear; Ophthalmoscopes – for examination of the eye; Throat Illuminators for examination of the mouth and throat; and Dermascopes for examination of the skin.

Ophthalmoscope

Throat Illuminator

Otoscope

Dermascope

Power supply from alkaline to A/C mains and everything in between

Our 2.5V Portable and Pocket instruments are available with alkaline battery handles in pocket (AA) and portable (C) sizes.

ADSTATION
ADC

Our 3.5V rechargeable battery handles (portable and desktop platforms) utilize Li-ion battery technology – the same found in state-of-the-art smart phones, tablets and electric cars. Combined with the super-efficient LED lamps, our Li-ion battery provides up to 50 hours continuous operation between charges (compared to just two to three for NiMH or NiCad) and a whopping 1200 charging cycles – 2.5x that of NiMH or NiCad.

That means nearly four years of daily recharging – even longer if charged less often. 3.5V instruments are also available with 120V corded A/C (or 230V) power supply.

EENT Instrument Heads

Otoscopes

Diagnostix™ 3.5V Otoscope Instrument Head - Item 5420*

- Fiberoptic light transmission for an unobstructed view
- Optical glass reduces reflection and provides 3x magnification
- Bidirectional swivel lens allows instrumentation
- Insufflator fitting for pneumatic otoscopy
- Compatible with Welch Allyn specula
- Instrument head uses universal bayonet mount, compatible with other brands of 3.5V power supply handles
- Anti-theft locking feature is standard
- Works with 5460, 5560, 5660 handles
- Choose from halogen/xenon or advanced LED illumination
- Manufactured in Germany, inspected and packaged in the USA
- Two-year warranty on instrument
- Lifetime warranty on LED lamp

*Specify “X” for Halogen/Xenon, or “L” for LED

Diagnostix™ 2.5V Pocket Otoscope Instrument Head - Item 5120N*

- 2.5V xenon or LED lamp for true tissue color
- Fiber optics for cool, obstruction-free light transmission
- Wide-angle swivel 2.5x viewing lens permits instrumentation
- Insufflator port (fitting and insufflator sold separately) for pneumatic otoscopy
- Works with 5160N handle
- One-year warranty on instrument
- Manufactured in Dubai, inspected and packaged in the USA

*Specify “L” for LED

Proscope™ 2.5V Otoscope Instrument Head - Item 5220

- 2.5V vacuum lamp
- Direct illumination
- Bayonet locking mount
- Removable 3x magnifying lens
- Includes autoclavable, polypropylene ear specula in sizes 2.5mm, 3.5mm, and 4.5mm
- Welch Allyn disposable specula adapter included
- Works with 5211-5 battery handle
- One-year warranty
- Manufactured in Pakistan, inspected and packaged in the USA

Ophthalmoscopes

Diagnostix™ Coax and Coax PLUS 3.5V Ophthalmoscope Instrument Heads

- High-performance aspherical condenser lens reduces corneal reflection
- Ergonomic design with integral thumb rest improves stability and allows one-finger control of all functions
- Synthetic rubber brow rest
- Dust proof
- Magnified/illuminated aperture viewing window
- Instrument head uses universal bayonet mount, compatible with other brands of 3.5V power-supply handles
- Anti-theft locking feature is standard
- Works with 5460, 5560, and 5660 handles
- Choose from halogen/xenon or advanced LED illumination
- Two-year warranty on instrument
- Lifetime warranty on LED lamp

Coax Ophthalmoscope includes - Item 5440*

- 29 viewing lenses from -35 to +40 (Plus) 1-10, 12, 15, 20, 40 – (Minus) 1-10, 15, 20, 25, 30, 35)
- 24 aperture/filter combinations for improved versatility

Coax PLUS Ophthalmoscope includes - Item 5442*

- 89 viewing lenses - (Plus) single step from 1-45 - (Minus) single step from 1-44
- Secondary focusing wheel with zero retention for quick correction of ametropias. Use this to provide virtually unlimited fine focus or as a fast focus in lieu of the 89 viewing lenses
- 28 aperture/filter combinations for improved versatility

*Specify “X” for Halogen/Xenon, or “L” for LED

EENT Instrument Heads

Diagnostix™ 2.5V Pocket Ophthalmoscope Instrument Head - Item 5140N*

- 2.5V xenon or LED lamp for true tissue color
- Five aperture selections (small spot, large spot, semicircle, fixed and red-free filter)
- 19 viewing lenses from -20 to +20 diopters for better resolution
- Illuminated magnified lens dial
- Rubber brow rest
- Meets or exceeds ISO 10942, ISO 15004-1, and ISO 15004-2
- Works with 5160N handle
- One-year warranty on instrument
- Manufactured in Dubai, inspected and packaged in the USA

(*Specify "L" for LED)

Proscope™ 2.5V Ophthalmoscope Instrument Head - Item 5240

- 2.5V vacuum lamp
- 24 corrective lenses from –25 to +40 diopters
- Medium spot aperture
- Bayonet locking mount
- Works with 5211-5 battery handle
- One-year warranty
- Manufactured in Pakistan, inspected and packaged in the USA

Throat Illuminator

Diagnostix

Diagnostix™ 3.5V Throat Illuminator Instrument Head - Item 5426

- PMMA light transmission
- Tongue blade holder facilitates examination of the mouth and throat
- Manufactured in Germany, inspected and packaged in the USA
- Eject button discards used tongue blade
- Works with 5460, 5560, 5660 handles
- Two-year warranty on instrument
- Lifetime warranty on LED lamp

(Specify "X" for Halogen/Xenon, or "L" for LED)

Dermascopes

Diagnostix™ 3.5V Dermascope Instrument Head - Item 5450

- Direct illumination
- Optical-grade 10x focusable magnifying lens
- Large, knurled focusing ring
- Removable contact plate with mm scale
- Comfortable, soft synthetic rubber eyepiece may be used with eyeglasses
- Anti-theft locking feature is standard
- Works with 5960, 5560, and 5660 handles
- LED illumination only
- Two-year warranty on instrument
- Lifetime warranty on LED lamp

Proscope™ 2.5V Dermascope Instrument Head - Item 5312-3

- Bright 2.5V halogen illumination ensures true tissue color for accurate identification
- 10x optic system
- Removable contact plate is auto clavable
- Large, knurled focusing ring
- Comfortable, soft synthetic rubber eyepiece
- Reticle contact plate etched onto the lens in millimeters permits easy measurement of suspicious lesions
- Bayonet locking mount
- Works with 5260 battery handle
- One-year warranty on instrument
- Manufactured in Pakistan, inspected and packaged in the USA

Power Supply

Diagnostix™ 3.5V Rechargeable Handle

- C-sized handle with 2600mAh Li-ion battery
- CNC machined from solid brass, the handle is chrome-plated in black with a ribbed surface for a sure grip
- Adtronic™ electronic rheostatic light-intensity control provides infinite continuous control and auto-off feature after two minutes
- Bayonet instrument mount is compatible with all major brands of 3.5V instrument heads. Requires our desk charger base (part 5500)
- Two-year warranty
- Works with 5420, 5440, 5442, 5450, 5426
- Replacement battery 5560BAT

Basic Diagnostix™ Adstation™
(5610L-3)

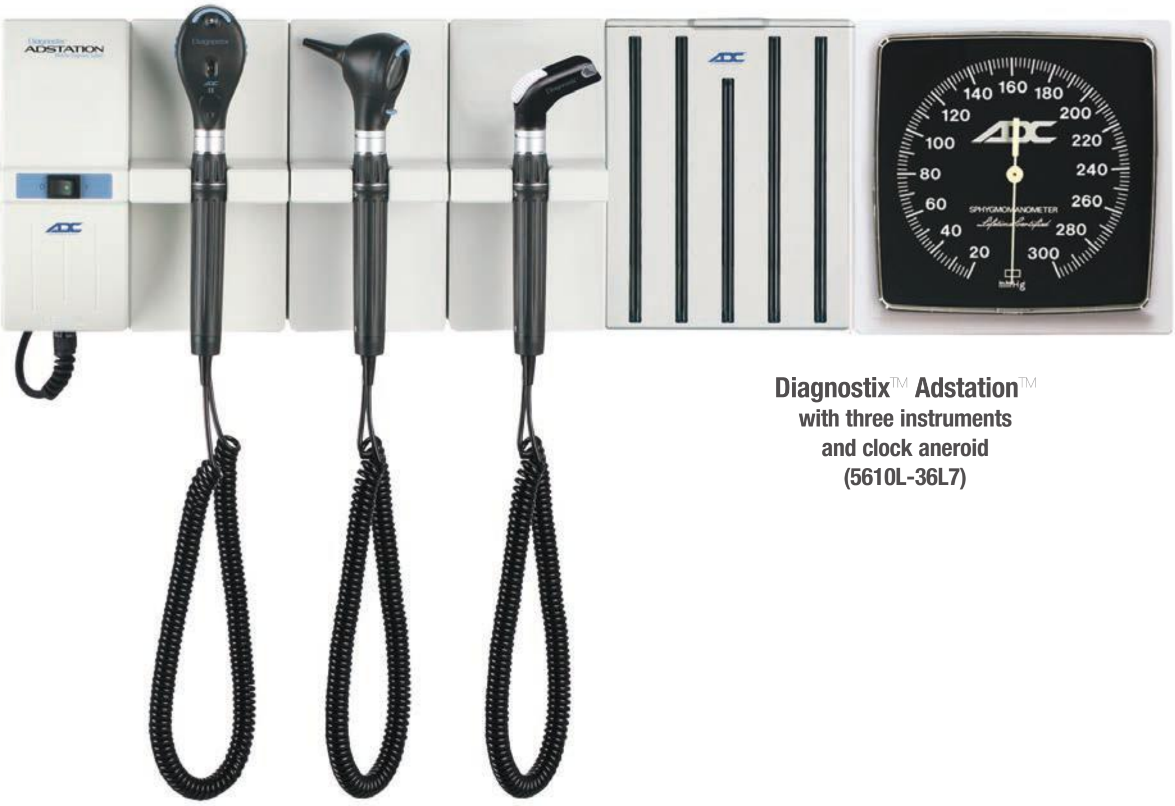
Diagnostix 3.5V Adstation

A complete diagnostic solution that puts a full assortment of core diagnostic tools within easy reach.

This modular system allows the practitioner to start with a single EENT instrument, then add up to three additional EENT instruments and a clock aneroid sphygmomanometer.

The Diagnostix™ 3.5V Adstation features

- Start with as little as a single-instrument wall transformer and expand with up to three more connected extension modules
- Choose from 3.5V Diagnostix™ Coax or Coax Plus Ophthalmoscope
- 3.5V Diagnostix™ Otoscope
- 3.5V Diagnostix™ Throat Illumination head available
- 3.5V Diagnostix™ Dermascope head available
- Choose from halogen/xenon or AdLED™ LED lighting technology
- Optional Diagnostix™ Clock Aneroid with cuff-storage basket, coiled tubing, and Adult and Large Adult inflation systems
- Optional wallboard for simplified wall mounting
- UL approved
- Lifetime warranty on clock aneroid, three years on inflation system
- Five-year warranty on wall transformer and extension modules
- Two-year warranty on Adstation™ and instruments heads
- Lifetime warranty on LED lamps



Diagnostix™ Adstation™
with three instruments
and clock aneroid

Laryngoscopes

ADC offers a broad line of Satin™ brand reusable laryngoscopes with either traditional or fiber optic illumination, and LED illuminated single-patient-use models.

Our new SPU blades and handle are the lowest-cost, disposable larygoscopes on the market. With an MSRP under $10 for blade and handle combined, these innovative instruments use fiber optic type light transmission with low-cost "green" LED illumination at a price less than it typically costs to disinfect reusable instruments. Blades are available in both Macintosh and Miller profiles in the most popular sizes.

Our Satin™ brand reusable blades are available in popular curved Macintosh, straight Miller, or Wisconsin (standard illumination only) profiles in sizes 00 to 4. Lightweight handles are available in up to three sizes. Fiber-optic models are available in Macintosh and Miller profiles and feature a removable light pipe for simplified disinfection and longer life.

All Satin™ brand reusable blades feature stainless-steel construction with a satin finish for unsurpassed performance and durability.

Order reusable laryngoscope components individually or in complete sets featuring a full selection of blades and handles in a fitted case. Each Satin™ reusable laryngoscope is inspected and packaged in the USA and includes a one-year warranty.

Every Satin™ laryngoscope component is fully compatible with all major brands of laryngoscopes conforming to ASTM F965 or ISO 7376.

Macintosh Disposable Fiberoptic

- Polycarbonate construction
- Fiber-optic light transmission provides cool, obstruction-free viewing
- Featuring the four most popular curved blade sizes (1-4)
- Individually hermetically sealed, 20/carton

CPR

ADC's comprehensive line of CPR products and resuscitation aids combine ADC's tradition of innovation with our commitment to value.

Choose from Berman or Guedel airways, each providing a variety of packaging options from bulk to kit packs.

Our line of Adsafe™ face shields and valve masks are also available in an incredible number of options.

Adsafe™ face shields are available with or without a one-way valve. The basic Adsafe™ face shield is available in individual foil packs – ideal for teaching institutions or first-aid applications.

Some items are also available packaged in convenient pocket keychains in an assortment of colors. Adsafe™ Plus face shield, with one-way valve, is available in a compact, splash-resistant keychain clamshell that measures a mere 2" x 1½" x ⅞", ideal for pocket, purse, glove box, or trauma kit.

The Adsafe™ CPR Pocket Resuscitator combines functionality with portability. Equipped with a filter-protected, replaceable one-way valve, it folds flat into a compact, splash-resistant storage case that measures just 5" x 4⅓" x 1½".

Berman Disposable Airways

The Berman Oropharyngeal Airways feature

- Smooth polyethylene airway with reinforced bite block
- Color coded for easy identification
- Single use
- Non-sterile
- Six sizes, embossed in mm on airway

Adsafe™ CPR Pocket Resuscitator

The Adsafe™ CPR Pocket Resuscitator combines functionality with portability. Equipped with a filter-protected, replaceable one-way valve, it folds flat into a compact, splash-resistant clamshell storage case that measures just 5” x 4⅓” x 1½”. Quick accessability, dual invertible use, and multiple connectability make this resuscitator an essential addition to your CPR equipment needs.

The Adsafe™ CPR Pocket Resuscitator features

- High-efficiency and low-resistance one-way valve minimizes the possibility of cross-contamination
- 15mm O.D. connector can be attached to any standard ventilation and oxygen equipment
- For use on adults, and inverted for infants/children
- Ergonomically shaped mask with soft-air cushion for leak-free performance, easy grasp, and patient comfort
- Disposable valve to avoid cross-contamination
- Elastic green strap to keep mask in place on patient
- Operating instructions, disposable gloves, and alcohol wipe included
- Pocket storage case

Caseware

Over the next five pages you'll find an impressive selection of belt holsters, pocket organizers, and medical bags, all produced to ADC's unrivaled standards of quality and ergonomic ingenuity.

Choose from belt holsters that secure just a few instruments to models that hold a virtual tool kit. Each sewn from super-tough nylon thread.

You can select a pre-stocked holster set loaded with just the right instruments or design your own custom set by ordering the case and individual components separately.

ADC's medical bags boast durable 600 denier nylon construction, compact design, and an impressive assortment of pockets.

Responder™ Holster

The world's best selling nylon holster, the 204 is made of super tough 600D nylon for unsurpassed durability.

The Responder™ features

- Super-tough water-repellent 600D nylon
- Lined with 8mm of cushioning foam
- Conforming lightweight configuration for wearing comfort
- Sewn with heavy nylon thread for durability
- Snap-open belt loop reinforced with hook-and-loop adhesive
- Accommodates belts up to 2½" wide
- Two deep slide-in pockets in back
- Three slide-in pockets beneath covered flap in front
- Measures 7¼" x 5" x ½"
- Weighs 2 oz (57g)
- One-year warranty

The Responder™ Set features

Neurological Instruments

ADC's line of neurological instruments includes a wide selection of reflex hammers and the most popular frequencies of tuning forks.

Reflex hammers and neuro instruments are available in Taylor, Buck, Babinski, Queen's Square, and Wartenburg pinwheel models. We also offer a complete set that includes all five instruments in a fitted box. Makes a great gift item.

ADC's six different tuning forks are machined from high-grade aluminum alloy and offer accurate frequency response from 128 to 4096 Hz.

Tuning Forks

Aluminum alloy tuning forks designed and manufactured to meet the demanding needs of the medical profession.

The ADC Tuning Forks features

- Non-magnetic, corrosion resistant aluminum alloy construction
- Weighs 1/3 of comparable steel tuning forks
- Produced from 3/8" x 1" bar stock for superior performance and consistent frequency accuracy
- Extra-long 2" handle of turned smooth aluminum to facilitate bone conduction tests
- Available in six frequency ranges (cycles per second, or cps)

Medicut™ Shears

Available in two sizes, ADC's Medicut™ shears are the world's best selling brand of medical grade utility shears.

Medicut™ Shears feature

- Razor sharp, super-hardened surgical stainless-steel blades with one serrated edge to cut through the toughest materials
- Blades tempered to a Rockwell hardness of C56 for unsurpassed durability
- Contoured polypropylene handles with large ring provide maximum control and comfort
- Extra-large rivet with a rated strength of 88kg assures rugged durability
- Fully auto-clavable to 143ºC (290ºF)
- Available in traditional 7¼", or smaller 5½" length
- Inspected in the USA
- Two-year quality performance guarantee
- CE marking

Medicut™ Shears also include

- Traditional 7¼" length for maximum leverage and strength
- Stainless-steel safety bandage tip

MiniMedicut™ Shears also include

- Smaller 5½" length is ideal for cutting bandages, tape, and clothing
- Polypropylene safety bandage tip color coordinated to the handle

Notes

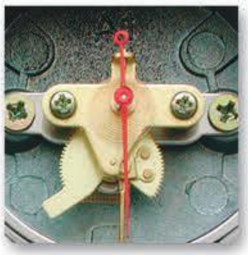
A Tradition of Quality and Innovation…

Over the past three decades, American Diagnostic Corporation has emerged as the leader in value-priced, premium quality diagnostic products for the healthcare industry.

Here's Why.

The Finest Components

ADC products are manufactured from the world's finest components utilizing state-of-the-art technologies and boasting proprietary features not found anywhere else, like gasket-sealed chestpieces, Adsoft™ Plus silicone eartips, the Adcuff™ with Size Guide™ marking system, and our remarkable gauge movements that withstand the toughest use. Proprietary features that combine to provide unsurpassed performance and robust durability.



Movement in our aneroid gauge

To ensure an unwavering commitment to uncompromising quality, each and every stethoscope and sphygmomanometer is assembled, inspected, and packaged in the USA.

Gauge endurance test machine tests manometers to 30K cycles

Cuff hook and loop adhesive test

Gaske-sealed chestpieces

The End Result?

A timeless instrument that will provide years of dependable service.

It Starts with the Best Design.

Each component is meticulously designed to meet our exacting standards and the demanding needs of our customers.

But It Doesn't End There!

We then subject virtually every component to rigorous quality control using custom-built testing equipment: gauge endurance test machines that subject our manometers to 30,000 cycles in just a few days; valve-and-bladder leak test machines; cuff hook-and-loop adhesive endurance test machines; thermometer baths that ensure our digital thermometers meet every international standard; and dimensional tests that ensure every component measures up to its original design specifications.

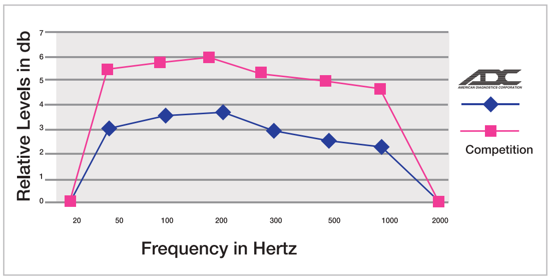
Thermometer Water Bath Tester

Valve-leak test machine

All in all, we subject our components to dozens of the most rigorous tests to ensure you get products of unsurpassed performance and rugged durability.

Compare the Performance.

Don't just take our word for it. Compare the performance, features, and durability of any ADC product to any other on the market. Then compare the price. You'll soon discover there's simply no comparison at all!



Acoustic-leakage test comparing ADC Sprague to competing models

How to Use This Catalog

The ADC catalog is designed for easy reading. Products are grouped by major category and generally organized by subcategory within each group for fast location. The following guidelines will assist readers unfamiliar with the layout of the catalog.

1. **Categories:** ADC products are divided into distinct groups: Vital Sign Monitors, Pulse Oximetry, Sphygmomanometers, Sphygmomanometer Parts, Stethoscopes, Thermometers, Diagnostics, Laryngoscopes, CPR, Caseware, Neurological Instruments, Penlights, and Instruments. Within larger groups (like scopes), products may be divided into subcategories, as well. (Scopes are divided into top-of-the-line Adscopes™ and economical Proscopes™.) Color key tabs in the right-hand margin permit quick location of the desired category.

2. **Table of Contents:** Page 3 lists by product category.

3. **Model Number Index:** If only the ADC number is known, the complete model number index (on pages 145-152) references the page number within the category where every ADC product may be found.

4. **Ordering Charts:** Our enhanced ordering charts make part number lookup much easier. They incorporate part numbers, color options, and quick-glance feature icons in one handy chart.

5. **Product Feature Charts:** Our product feature charts (PFCs) highlight features and specifications for the major product categories. The ADC product number is in the left-hand column. The various features, part names, and specifications most frequently requested are in the top row. To find the desired information, locate the intersection of the row (with the desired model number) and the column (with the desired feature).

6. **Color Chart:** A larger view of a printed representation of a product's color is printed on the opposite page. It is a ready reference for easily looking up specific products.

7. **Product Feature Icons:** Icons identifying a product's major features are used throughout the book. The opposite page contains a reference to all icons for easy identification.

with Dedication Toward the Future.

Because of our commitment to provide the very highest quality product and service,
ADC has earned ISO 13485:2012 and ISO 9001:2008 certification.

The ISO 13485, a certification standard specifically written for medical device manufacturers, was awarded to ADC on August 12, 2005. The broader ISO 9001 certification by TUV Rheinland was presented on September 2, 2005, while the SCC ISO 13485 certification, recognized by the Canadian regulatory authority, was awarded on September 27, 2005.

The ISO 13485:2012 standard is specifically written for medical device manufacturers while the broader ISO 9001:2008 quality management standard is sought after by any firm committed to quality. The designations were earned from TUV Rheinland, a leading international standards, testing registration, and certification organization. ISO certification is a way to differentiate suppliers, particularly where consistency of product and reliability is crucial.

ANAB ACCREDITED Certified to ISO 9001:2008 | TÜV Rheinland | ISO 13485 Registered

ADC's ISO certification ensures that we build quality into our products and services and avoid costly after-the-fact inspections, warranties, and rework. Our steadfast dedication to the ISO process provides you, the customer, with these benefits:

- Services designed to meet your needs and ensure your satisfaction
- Products manufactured with quality planned and documented in every step of the process
- A team of trained employees, performing consistently with the goal of continuously improving all operations
- Our commitment to you to do what we say we will do

Everyone at ADC is part of the ISO experience: marketing, sales, accounting, customer service, shipping/receiving, and manufacturing. It is not just a manufacturing system, but a company-wide way of doing business that puts the needs of our customers at the center of all we do. ISO certification is not a one-time event, it is just one step in a continuous quality improvement process.

What is ISO?

ISO, the International Organization for Standardization, is a worldwide federation of national standards bodies from over 140 countries. The purpose of ISO is to promote the development of standardization and related world activities to facilitate the international exchange of goods and services, and to develop cooperation in intellectual, scientific, technological, and economic activity.

The American National Standards Institute (ANSI) represents the United States in the International Organization for Standardization. It is a private, nonprofit membership organization composed of private and public sector organizations, and was a founding member of ISO. ANSI does not develop American national standards but facilitates their development by establishing consensus among qualified groups. ANSI also has a role in governing the ISO.

What are the Standards?

The ISO 9000 family of standards represent an international consensus on "good manufacturing practices." When adhered to, these practices ensure that the certified company can consistently deliver products or services that meet requirements for quality and timeliness of delivery.

An independent auditor, who verifies that the processes influencing quality conform to the relevant standard's requirements, provides ISO 9001 certification. The objective is to give a company's management and customers confidence that the company is in control of the way it does business.

Why be ISO Certified?

While no organization must be ISO 9001 certified, it has become a standard for conducting business in the international arena. In fact, ISO 9001 is the only quality system accepted internationally. Many companies in the European Community have become ISO certified and many are requiring their suppliers prove that they have a quality system, such as ISO, in place as a condition of purchase. To keep this certification, a company must maintain this commitment and incorporate a process of continuous improvement and customer satisfaction…

And that is our commitment to you!
