Our paper products are made from 100% rapidly renewable* virgin fiber† — Up to 80% eucalyptus and up to 20% acacia trees.

Manufacturing facility for our paper products meets the USGBC LEED standards.‡

* Eucalyptus and Acacia trees are planted, maintained and harvested like a crop, they mature in six years which is why they are rapid in comparison to a Southern Pine tree which will take between 20–30 years to mature to harvestable size.

† Virgin Fiber is fiber previously not used in production of another product.

‡ Contributes to an environmentally friendly building operation and meets the requirements of the U.S. Green Building Council (USGBC) LEED (Leadership in Energy and Environmental Design) standards.
