MIDMARK®

IQ holter

The Midmark IQholter® System combines a compact digital recorder with three powerful software applications. Our three tiers of Holter solutions are specifically designed to meet different practice needs, from family physicians to cardiologists.

A POWERFUL HOLTER SYSTEM DESIGNED FOR YOUR PRACTICE

IQholter® Recorder:

- Small and lightweight, the recorder weighs only 2.8 oz.

- Well-lit display and intuitive keypad make clinician navigation and menu control easy

- On-screen leads and channel identification for speed and simplicity during patient hookup

- Automatic startup self-test with warning alarm ensures reliable recording

- 5-lead hookup for 3-channel recording; 7-lead option available

- 24-hour standard recording (48 and 72-hour recording capabilities available)

- Removable Secure Digital (SD) card allows for immediate patient turnaround

IQholter®:

- Color-coded arrhythmia events to identify different ECG morphologies

- Comprehensive reports with auto narrative summary to effectively reveal important test data and statistics

- Ability to edit and review test results and full disclosure locally or on the network without printing

IQholter® EX:

- Provides the ability to preview and adjust criteria settings to match patient's recording before the analysis

- Identifies Atrial Fibrillation (AF) events based on parameters set by the clinician

- Smart page scan to highlight specified events and reveal entire episodes at a glance

- Arrhythmia templates with intelligent sorting to facilitate quick reviews and edits

- QT and QTc analysis for identifying prolonged intervals

IQholter® EP:

- Offers all the standard features of IQholter® and IQholter® EX

- Includes pacemaker detection to identify single and dual-chamber paced beats for non-captures and sensing failures

- Automatic pacemaker detection eliminates setting changes between patients

The IQholter® Recorder can be worn as comfortably as an MP3 player or cell phone.
