Antimicrobial Dressings with PHMB

Consider Cardinal Health™ AMD Antimicrobial Dressings — with the power of proven, affordable PHMB (polyhexamethylene biguanide) — when your patients need it most. It's protection that works as hard as you do to prevent infection. From Cardinal Health, the pioneer in skin protection.

Hard on bacteria. Easy on skin.

The Cardinal Health line of antimicrobial dressings (AMD) is impregnated with 0.2% PHMB (polyhexamethylene biguanide), a bacteria-killing polymer. So you get powerful antimicrobial action that stays gentle on skin.

- PHMB kills a broad-spectrum of bacteria
- Provides protection against 15 gram-negative, gram-positive and fungi/yeast microorganisms
- Resists bacterial colonization and reduces bacterial penetration through the dressing
- Proven to perform without negatively impacting epithelization
- Low to minimal cytotoxicity
- No known resistances

More power to protect. More power to prevent. More power to heal.

Learn how PHMB works.

PHMB attacks bacteria on and within the dressing to help you keep bacteria out of the wound, limit cross-contamination and promote a healing environment.

Effective against a broad spectrum of bacteria:

Methicillin-resistant Staphylococcus aureus (MRSA)

Vancomycin-resistant Enterococcus (VRE)

Acinetobacter baumannii

Staphylococcus epidermidis

Pseudomonas aeruginosa

Escherichia coli

Candida albicans

Coagulase-negative Staphylococcus

Proteus mirabilis

Serratia marcescens

Enterobacter cloacae

Klebsiella pneumoniae

Enterococcus faecalis

Propionibacterium acnes

Give more patients the prevention they need:

- diabetic patients
- surgical patients
- elderly patients
- CABG and orthopedic surgeries
- caesarean sections
- heel or foot ulcers
