Fast

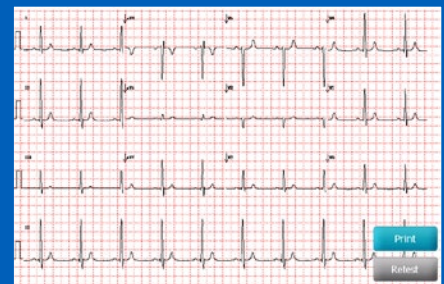

Instant-On Feature

Powers the device up quickly, and eliminates the typical startup delay to take an ECG.

12-Lead ECG Preview

Large display provides three, six, or 12-lead ECG preview options.

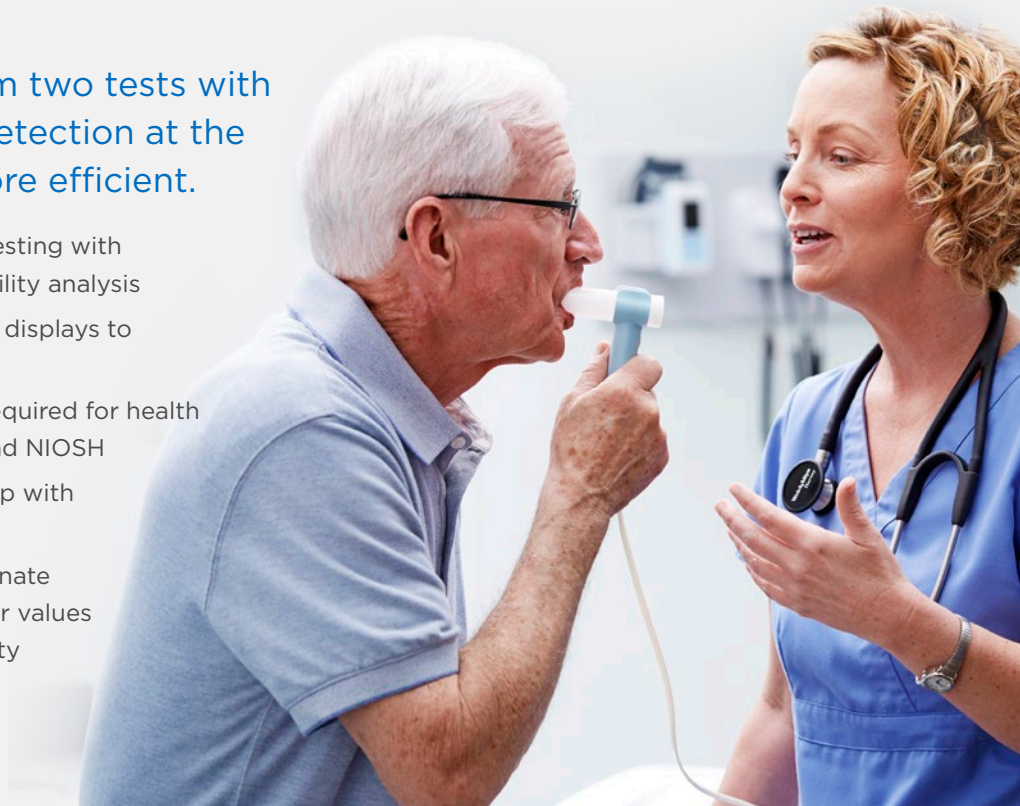

ECG Print Preview

Save time and reduce paper costs by verifying the ECG test quality prior to printout.

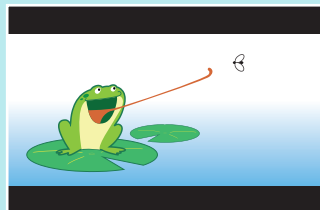

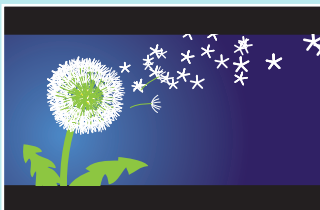

Spirometry Option

The CP 150 lets you perform two tests with one device, to help make detection at the point of care easier and more efficient.

- > Perform FVC and pre- and post-BD testing with automatic interpretation and reversibility analysis
- > Customize report formats and screen displays to fit your needs and workflow
- > Performs spirometry tests typically required for health and safety purposes including ATS and NIOSH
- > Automatic lung age calculation to help with smoking cessation programs
- > Integrated ambient sensors that eliminate the need for the user to find and enter values for temperature, pressure and humidity

The CP 150 spirometry option features four incentive screens to help educate and coach your patients:

Connectivity Options that mean you'll never have to scan and shred an ECG test again.
